#### **PROGRAMME OUTCOMES (POs)**

A student upon successful completion of master's degree in nursing should be able to assume responsibilities as nurse specialists, consultants, educators, administrators in a wide variety of professional settings.

#### PROGRAMME SPECIFIC OUTCOMES (PSOs)

- 1. Utilize/apply the concepts, theories and principles of nursing science
- 2. Demonstrate advance competence in practice of nursing.
- 3. Practice as a nurse specialist.
- 4. Demonstrate leadership qualities and function effectively as nurse educator and manager.
- 5. Demonstrate skill in conducting nursing research, interpreting and utilizing the findings from health related research.
- 6. Demonstrate the ability to plan and effect change in nursing practice and in the health care delivery system.
- 7. Establish collaborative relationship with members of other disciplines.
- 8. Demonstrate interest in continued learning for personal and professional advancement.

#### FNM115001 - NURSING EDUCATION

Placement : I<sup>st</sup> Year

Hours of Instruction Theory 150 Hours Practical 150 Hours Total : 300 Hours

#### **Course Description :-**

This course is designed to assist students to develop a broad understanding of Fundamental Principles, concepts, trends and issues related to education and nursing education. Further, it would provide opportunity to students to understand, appreciate and acquire skills in teaching and evaluation, curriculum development, implementation, maintenance of standards and accreditation of various nursing educational programs.

Objectives :-

At the end of the course, students will be able to :

- 1. Explain the aims of education, philosophies, trends in education and health: its impact on nursing education.
- 2. Describe the teaching learning process.
- 3. Prepare and utilize various instructional media and methods in teaching learning process.
- 4. Demonstrate competency in teaching, using various instructional strategies.
- 5. Critically analyze the existing nursing educational programs, their problems, issues and future trends.
- 6. Describe the process of curriculum development, and the need and methodology of curriculum change, innovation and integration.
- 7. Plan and conduct continuing nursing education programs.
- 8. Critically analyze the existing teacher preparation

Programs in nursing.

- 9. Demonstrate skill in guidance and counseling.
- 10. Describe the problems and issues related to administration of nursing curriculum including selection and organization of clinical experience.

— Faculty of Nursing — Gokul Nursing College

- 11. Explain the development of standards and accreditation process in nursing education programs.
- 12. Identify research priorities in nursing education.
- 13. Discuss various models of collaboration in nursing education and services.
- 14. Explain the concept, principles, steps, tools and techniques of evaluation
- 15. Construct, administer and evaluate various tools for assessment of knowledge, skill, and attitude.

#### **Course Content**

Units	Hours		Course Content
	Theory	Practical	
Ι	10		<ul> <li>Introduction :</li> <li>Education :Definition, aims, concepts, philosophies &amp; their education implications,</li> <li>Impact of Social, economical, political &amp; technological changes on education:</li> <li>Professional education</li> <li>Current trends and issues in education</li> <li>Educational reforms and National Educational policy, various educational commissions-reports</li> <li>Trends in development of nursing education in India</li> </ul>

II	20	30	Teaching – Learning Process
	-		□ Concepts of teaching and learning: Definition,
			theories of teaching and learning, relationship between teaching and
			<ul> <li>learning.</li> <li>Educational aims and objectives; types, domains, levels, elements and writing of educational objectives</li> <li>Competency based education(CBE) and outcome based education(OBE)</li> <li>Instructional design: Planning and designing the lesson, writing lesson plan : meaning, its need and importance, formats.</li> <li>Instruction strategies – Lecture, discussion, demonstration, simulation, laboratory, seminar, panel, symposium, problem solving, problem based learning (PBL), workshop, project, role-play(socio- drama), clinical teaching methods, programmed instruction, self directed learning(SDL), micro teaching, computer assisted instruction(CAI), computer assisted learning (CAL)</li> </ul>
III	10	10	Instructional media and methods
111	10	10	<ul> <li>Key concepts in the selection and use of media in education</li> </ul>
			<ul> <li>Developing learning resource material using different</li> </ul>
			media
			□ Instructional aids – types, uses, selection,
			preparation, utilization.
			□ Teacher's role in procuring and managing
			instructional Aids – Project and non-projected aids, multi media, video-tele conferencing etc
IV	10		Measurement and evaluation:
			<ul> <li>Concept and nature of measurement and evaluation, meaning, process, purposes, problems in evaluation and measurement.</li> <li>Principles of assessment, formative and summative assessment-internal assessment external examination, advantages and disadvantages.</li> <li>Criterion and norm referenced evaluation,</li> </ul>

V	12	10	Standardized and non-standardized tests :
			<ul> <li>Meaning, characteristics, objectivity, validity, reliability, usability, norms, construction of tests-</li> <li>Essay, short answer questions and multiple choice questions.</li> <li>Rating scales, checklist, OSCE/OSPE(Objective structured clinical/practical examination)</li> <li>Differential scales, and summated scales, sociometry, anecdotal record, attitude scale, critical incident technique</li> <li>Question bank-preparation, validation, moderation by panel, utilization</li> <li>Developing a system for maintaining confidentiality</li> </ul>
VI	8	5	Administration, Scoring and Reporting
			□ Administering a test; scoring, grading versus marks
			□ Objective tests, scoring essay test, methods of scoring, Item analysis.
VII	12	6	<b>Standardized Tools</b> Fests of intelligence aptitude, interest, personality, achievement,
			socio-economic status scale, tests for special mental and physical
			abilities and disabilities.
VIII	5	6	Nursing Educational programs
	_		□ Perspectives of nursing education: Global and
			national.
			□ Patterns of nursing education and training programmes in India. Non-university and University programs:
			ANM, GNM, Basic B.Sc. Nursing, Post Certificate B.Sc. Nursing,
			M.Sc(N) programs, M.Phil and Ph.D) in Nursing, post basic diploma
			programs, nurse practitioner programs.
IX	12	25	Continuing Education in Nursing
			□ Concepts – Definition, importance, need scope,
			principles of adult learning, assessments of learning needs, priorities, resources.
			<ul> <li>Program planning, implementation and evaluation of continuing</li> </ul>
			education programs.
			□ Research in continuing education.
			Distance education in nursing.

*7				
X	10	10	Cu	rriculum Development
				Definition, curriculum determinants, process and steps of
				curriculum development, Curriculum models, Types and
				framework.
				Formulation of philosophy, objectives, selection and
				organization of learning experiences; master plan, course plan,
				unit plan. Evaluation strategies, process of curriculum change, role of
				students, faculty, administrators, statutory bodies and other
				stakeholders.
			Equ	ivalency of courses: Transcripts, credit system.
XI	8	4		cher preparation
				Teacher – roles & responsibilities, functions,
				characteristics, competencies, qualities,
				Preparation of professional teacher
				Organizing professional aspects of teacher
				aration programs
				Evaluation: self and peer
			Crit	ical analysis of various programs of teacher education.

#### FNM115002 - ADVANCE NURSING PRACTICE

Placement: 1<sup>ST</sup> Year

Hours of Instruction Theory 150 Hours Practical 200 Hours Total : 350 Hours

#### **Course Description**

The course is designed to develop an understanding of concepts and constructs of theoretical basis of advance nursing practice and critically analyze different theories of nursing and other disciplines.

#### **Objectives:**

At the end of the course the students will be able to:

- 1. Appreciate and analyze the development of nursing as a profession.
- 2. Describe ethical, legal, political and economic aspects of health care delivery and nursing practice.
- 3. Explain bio- psycho- social dynamics of health, life style and health care delivery system.
- 4. Discuss concepts, principles, theories, models, approaches relevant to nursing and their application.
- 5. Describe scope of nursing practice.
- 6. Provide holistic and competent nursing care following nursing process approach.
- 7. Identify latest trends in nursing and the basis of advance nursing practice.
- 8. Perform extended and expanded role of nurse.
- 9. Describe alternative modalities of nursing care.
- 10. Describe the concept of quality control in nursing.
- 11. Identify the scope of nursing research.
- 12. Use computer in patient care delivery system and nursing practice.
- 13. Appreciate importance of self development and professional advancement.

# **Course Content :-**

Unit	Hours	Content
Ι	10	Nursing as a Profession
		<ul> <li>History of development of nursing profession, characteristics, criteria of the profession, perspective of nursing profession-national, global</li> <li>Code of ethics(INC), code of professional conduct(INC), autonomy and accountability, assertiveness, visibility of nurses, legal considerations,</li> <li>Role of regulatory bodies</li> <li>Professional organizations and unions-self defense, individual and collective bargaining</li> <li>Educational preparations, continuing education, career opportunities, professional advancement &amp; role and scope of nursing education.</li> <li>Role of research, leadership and management.</li> <li>Quality assurance in nursing (INC).</li> <li>Futuristic nursing.</li> </ul>

#### FNM115101 - CLINICAL SPECIALITY – I MEDICAL SURGICAL NURSING

Placement: 1<sup>st</sup> Year

Hours of instruction Theory: 150 Hours Practical: 650 Hours Total : 800 Hours

# **Course Description**

This course is common for the students undergoing clinical speciality-II in neuro science nursing/cardiovascular & thoracic nursing/critical care nursing/oncology nursing/orthopaedic and rehabilitation nursing/nephro & urology nursing, gastroenterology nursing/ geriatric nursing.

It is designed to assist students in developing expertise and in depth knowledge in the field of medical Surgical Nursing. It will help students to appreciate the patient as a holistic individual and develop skill to function as a specialized Medical-Surgical Nurse. It will further enable the student to function as educator, manager and researcher in the field of Medical – Surgical Nursing.

Objectives :-

At the end of the course the students will be able to:

- 1. Appreciate the trends & issues in the field of Medical Surgical Nursing as a speciality.
- 2. Apply concepts & theories related to health promotion.
- 3. Appreciate the client as a holistic individual.
- 4. Perform physical, psychosocial assessment of Medical Surgical patients.
- 5. Apply Nursing process in providing care to patients.
- 6. Integrate the concept of family centered nursing care with associated disorder such as genetic, congenital and long-term illness.
- 7. Recognize and manage emergencies with Medical- Surgical patients.
- 8. Describe various recent technologies & treatment modalities in the management of critically ill patients.

#### Faculty of Nursing Gokul Nursing College

- 9. Appreciate the legal & ethical issues relevant to Medical Surgical Nursing.
- 10. Prepare a design for layout and management of Medical Surgical

- 11. Appreciate the role of alternative systems of Medicine in care of patients
- 12. Incorporate evidence based Nursing practice and identify the areas of research in the field of Medical Surgical Nursing.
- 13. Recognize the role of Nurse practitioner as a member of the Medical Surgical health team.
- 14. Teach Medical Surgical Nursing to undergraduate nursing students & in-service nurses.

#### COURSE CONTENT:

Unit	Hours	Content
Ι	5	Introduction:
		<ul> <li>Historical development of Medical- Surgical Nursing in India.</li> </ul>
		Current status of health and disease burden in India.
		□ Current concept of health.
		Trends & issues in Medical – Surgical Nursing.
		Ethical & cultural issues in Medical – Surgical Nursing.
		$\square$ Rights of patients.
		National health policy, special laws & ordinances relating to older
		people.
		$\Box$ National goals.
		$\Box$ Five year plans.
		National health programs related to adult health.
II	20	Health Assessment of patients
		□ History taking.
		Physical examination of various systems.
		Nutritional assessment.
		<ul> <li>Related investigations and diagnostic assessment.</li> </ul>

III	5	Care in hospital settings:
		□ Ambulatory care.
		□ Acute and Critical care.
		□ Long term care.
		□ Home Health Care.
		□ Characteristics, care models, practice settings, interdisciplinary team.
		□ Hospitalization- effects of hospitalization on the patient & family.

#### FNM115201 - CLINICAL SPECIALITY-I

#### OBSTETRIC AND GYNAECOLOGICAL NURSING

Placement : 1st year

Hours of Instruction Theory : 150 Hours.

Practical: 650 Hours.

Total: 800 Hours

#### **Course Description**

This course is designed to assist students in developing expertise and in- depth understanding in the field of Obstetric and Gynaecological Nursing. It will help students to appreciate the client as a holistic individual and develop skill to function as an independent midwifery practitioner. It will further enable the student to function as educator, manager, and researcher in the field of Obstetric and Gynaecological nursing.

#### **Objectives**

At the end of the course the students will be able to:

- 1. Appreciate the trends in the field of midwifery, obstetrics and gynaecology as a speciality.
- 2. Describe the population dynamics and indicators of maternal and child health
- 3. Describe the concepts of biophysical, psychological and spiritual aspects of normal pregnancy, labor and puerperium.
- 4. Provide comprehensive nursing care to women during reproductive period and

— Faculty of Nursing — Gokul Nursing College

newborns.

- 5. Integrate the concepts of family centered nursing care and nursing process approach in obstetric and gynaecological nursing.
- 6. Identify and analyze the deviations from normal birth process and refer appropriately.
- 7. Describe the pharmacological agents, their effects during pregnancy, child birth, puerperium, lactation and the role of nurse
- 8. Counsel adolescents, women and families on issues pertaining to pregnancy, child birth and lactation
- 9. Describe the role of various types of complementary and alternative therapies in obstetric and gynaecological nursing..
- 10. Incorporate evidence based nursing practice and identify the areas of research in the field of obstetric and gynaecological nursing.
- 11. Describe the recent advancement in contraceptive technology and birth control measures
- 12. Appreciate the legal and ethical issues pertaining to obstetric and gynaecological nursing.

#### **Course Content :-**

### COMMUNITY HEALTH NURSING

Placement: 1st year

Hours of Instruction Theory: 150 Hours.

Practical: 650 Hours.

Total: 800 Hours

Course Description

The course is designed to assist students in developing expertise and in- depth understanding in the field of Community Health Nursing. It would help students to appreciate holistic life style of individuals, families & groups and develop skills to function as Community Health Nurse specialist/practitioner. It would further enable student to function as an educator, manager and researcher in the field of Community Health nursing.

#### **Objectives**

At the end of the course, the student will be able to:

- 1. Appreciate the history and development in the field of Community Health and Community Health Nursing.
- 2. Appreciate role of individuals and families in promoting health of the Community.
- 3. Perform physical, developmental and nutritional assessment of individuals, families and groups.
- 4. Apply the concepts of promotive, preventive, curative and rehabilitative aspects of health while providing care to the people.
- 5. Apply nursing process approach while providing care to individuals, families, groups and community.
- 6. Integrate the concepts of family centered nursing approach while providing care to the community.
- 7. Recognize and participate in the management of emergencies, epidemics and disasters.
- 8. Apply recent technologies and care modalities while delivering community health nursing care.

# Gokul Nursing Gokul Nursing College

- 9. Appreciate legal and ethical issues pertaining to community health nursing care.
- 10. Conduct community health nursing care projects.
- 11. Participate in planning, implementation and evaluation of various national health and family welfare programmes at local, state and the national level.
- 12. Incorporate evidence based nursing practice and identify the areas of research in the community settings.
- 13. Participate effectively as a member of Community Health team.
- 14. Coordinate and collaborate with various agencies operating in the community by using inter-sectoral approach.
- 15. Teach community health nursing to undergraduates, in-service nurses and the community health workers.
- 16. Demonstrate leadership and managerial abilities in community health nursing practice

# FNM115003 - NURSING RESEARCH AND STATITICS

Placement: 1st year

Hours of Instruction Theory: 150 Hours. Practical: 100 Hours.

Total: 250 Hours

# Part-A : Nursing Research

Theory 100 Hours

Practical 50 Hours Total : 150 Hours

Course Description

The course is designed to assist the students to acquire an understanding of the research methodology and statistical methods as a basis for identifying research problem, planning and implementing a research plan. It will further enable the students to evaluate research studies and utilize research findings to improve quality of nursing practice, education and management.

### **General Objectives:**

At the end of the course, the students will be able to:

- 1. Define basic research terms and concepts.
- 2. Review literature utilizing various sources
- 3. Describe research methodology
- 4. Develop a research proposal.
- 5. Conduct a research study.
- 6. Communicate research findings
- 7. Utilize research findings
- 8. Critically evaluate nursing research studies.
- 9. Write scientific paper for publication.

# Part – B : Statistics

Hours of Instruction Theory 50 Hours Practical 50 Hours Total : 100 Hours

**Course Description** 

At the end of the course, the students will be able to develop an understanding of the statistical methods and apply them in conducting research studies in nursing.

### **General Objectives**

At the end of the course the students will be able to:

- 1. Explain the basic concepts related to statistics
- 2. Describe the scope of statistics in health and nursing
- 3. Organize, tabulate and present data meaningfully.
- 4. Use descriptive and inferential statistics to predict results.
- 5. Draw conclusions of the study and predict statistical significance of the results.
- 6. Describe vital health statistics and their use in health related research.
- 7. Use statistical packages for data analysis

Unit	Hours		Course Content
	Theory	Practical

### FNM125101 - NURSING MANAGEMENT

Placement : II Year

Hours of Instruction Theory 150 Hours Practical 150 Hours Total : 300 Hours

#### **Course Description**

This course is designed to assist students to develop a broad understanding of Principles, concepts, trends and issues related to nursing management. Further, it would provide opportunity to students to understand, appreciate and acquire skills in planning, supervision and management of nursing services at different levels to provide quality nursing services.

#### **Objectives**

At the end of the course, students will be able to:

- 1. Describe the philosophy and objectives of the health care institutions at various levels.
- 2. Identify trends and issues in nursing
- 3. Discuss the public administration, health care administration vis a vis nursing administration
- 4. Describe the principles of administration applied to nursing
- 5. Explain the organization of health and nursing services at the various levels/institutions.
- 6. Collaborate and co-ordinate with various agencies by using multi- sectoral approach
- 7. Discuss the planning, supervision and management of nursing workforce for various health care settings.
- 8. Discuss various collaborative models between nursing education and nursing service to improve the quality of nursing care
- 9. Identify and analyse legal and ethical issues in nursing administration
- 10. Describe the process of quality assurance in nursing services.
- 11. Demonstrate leadership in nursing at various levels

### FNM125102 - CLINICAL SPECIALITY-II

## MEDICAL SURGICAL NURSING

## **SUB SPECIALITY – CARDIO VASCULAR AND THORACIC NURSING**

Placement: II year

Hours of Instruction Theory: 150 Hours.

Practical: 950 Hours.

Total: 1100 Hours

#### **Course Description**

This course is designed to assist students in developing expertise and in- depth understanding in the field of cardiovascular and thoracic nursing. It will help students to develop advanced skills for nursing intervention in various cardio medical and surgical conditions. It will enable the student to function as Cardio vascular and Thoracic Nurse practitioner/specialist. It will further enable the student to function as educator, manager and researcher in the field of cardio vascular and thoracic nursing.

### Objectives

At the end of the course the students will be able to:

- 1. Appreciate trends and issues related to cardio vascular and thoracic Nursing.
- 2. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of cardio vascular and thoracic conditions
- 3. Participate in national health programs for health promotion, prevention and rehabilitation of patients with cardio vascular and thoracic conditions
- 4. Perform physical, psychosocial & spiritual assessment
- 5. Assist in various diagnostic, therapeutic and surgical procedures
- 6. Apply nursing process in providing comprehensive care to patients with cardio vascular and thoracic conditions
- 7. Demonstrate advance skills/competence in managing patients with cardio vascular and thoracic conditions including Advance Cardiac Life Support.

— Faculty of Nursing — Gokul Nursing College

- 8. Describe the various drugs used in cardio vascular and thoracic conditions and nurses responsibility
- 9. Demonstrate skill in handling various equipments/gadgets used for critical care of cardio vascular and thoracic patients
- 10. Appreciate team work & coordinate activities related to patient care.
- 11. Practice infection control measures.
- 12. Identify emergencies and complications & take appropriate measure
- 13. Discuss the legal and ethical issues in cardio vascular and thoracic nursing
- 14. Assist patients and their family to cope with emotional distress, grief, anxiety and spiritual needs.
- 15. Appreciate the role of alternative system of medicine in care of patient
- 16. Incorporate evidence based nursing practice and identify the areas of research in the field of cardio vascular and thoracic nursing
- 17. Identify the sources of stress and manage burnout syndrome among health care providers.
- 18. Teach and supervise nurses and allied health workers.
- 19. Design a layout of ICCU and ICTU and develop standards for cardio vascular and thoracic nursing practice.

## **Content Outline**

Unit	Hours	Content		
Ι	5	Introduction		
		□ Historical development, trends and issues in the field of cardiology.		
		□ Cardio vascular and thoracic conditions – major health problem.		
		<ul> <li>Concepts, principles and nursing perspectives</li> </ul>		
		□ Ethical and legal issues		
		<ul> <li>Evidence based nursing and its application in cardio vascular and thoracic nursing( to be incorporated in all the units)</li> </ul>		
II	5	Epidemiology		
		□ Risk factors: hereditary, psycho social factors, hypertension,		
		smoking, obesity, diabetes mellitus etc		
		Health promotion, disease prevention, Life style modification		
		National health programs related to cardio vascular and thoracic conditions		
		□ Alternate system of medicine		
		Complementary therapies		
III	5	Review of anatomy and physiology of cardio vascular and		
		respiratory system		
		□ Review of anatomy and physiology of heart, lung, thoracic cavity and blood		
		vessels. Embryology of heart and lung.		
		Coronary circulation Use and electro physicleary of heart		
		<ul> <li>Hemodynamics and electro physiology of heart.</li> <li>Dis showing a filled in relation to confident function.</li> </ul>		
		Bio-chemistry of blood in relation to cardio pulmonary function.		
IV	20	Assessment and Diagnostic Measures:		
		□ History taking		
		□ Physical assessment		
		• Heart rate variability: Mechanisms, measurements, pattern, factors,		
		impact of interventions on HRV		
		Diagnostic tests		
		• Hemodynamic monitoring: Technical aspects, monitoring,		
		functional hemodynamic indices, ventricular function indices,		

Unit	Hours	Content
		<ul> <li>output measurements (Arterial and swan Ganz monitoring). Blood gases and its significance, oxygen supply and demand</li> <li>Radiologic examination of the chest: interpretation, chest film findings</li> <li>Electro cardiography(ECG) : electrical conduction through the heart, basic electrocardiography, 12 lead electrocardiogram, axis determination <ul> <li>ECG changes in: intraventricular conduction abnormalities- Arrhythmias, ischemia, injury and infarction, atrial and ventricular enlargement, electrolyte imbalance,</li> </ul> </li> <li>Echocardiography: technical aspects, special techniques, echocardiography of cardiae structures in health and disease, newer techniques</li> <li>Nuclear and other imaging studies of the heart: Magnetic Resonance Imaging.</li> <li>Cardio electrophysiology procedures: diagnostic studies, interventional and catheter ablation, nursing care</li> <li>Exercise testing: indications and objectives, safety and personnel, pretest considerations, selection, interpretation, test termination, recovery period</li> <li>Cardiae catheterization: indications, contraindications, patient preparation, procedure, interpretation of data</li> <li>Pulmonary function test: Bronchoscopy and graphies</li> <li>Interpretation of diagnostic measures</li> <li>Nurse's role in diagnostic tests</li> </ul> <li>Laboratory tests using blood: Blood specimen collection, Cardiac markers, Blood lipids, Hematologic studies, Blood cultures, Coagulation studies, Arterial blood gases, Blood Chemistries, cardiae enzyme studies, Serum Concentration and role of nurse</li>

V	25	Cardiac disorders and nursing management:
		□ Etiology, clinical manifestations, diagnosis, prognosis, related
		pathophysiology, treatment modalities and nursing management of:
		• Hypertension
		Coronary Artery Disease.
		Angina of various types.
		• Cardiomegaly
		Myocardial Infarction, Congestive cardiac failure
		<ul> <li>Heart Failure, Pulmonary Edema, Shock.</li> <li>Rheumatic heart disease and other Valvular Diseases</li> </ul>
		Inflammatory Heart Diseases, Infective Endocarditis, Myocarditis, Pericarditis.
		<ul> <li>Cardiomyopathy, dilated, restrictive, hypertrophic.</li> </ul>
		• Arrhythmias, heart block
		Associated illnesses
VI	10	Altered pulmonary conditions
		□ Etiology, clinical manifestations, diagnosis, prognosis, related
		pathophysiology, treatment modalities and nursing management of:
		Bronchitis
		<ul> <li>Bronchial asthma</li> <li>Bronchiectasis</li> </ul>
		<ul> <li>Dionenicettasis</li> <li>Pneumonias</li> </ul>
		<ul> <li>Lung abscess, lung tumour</li> </ul>
		<ul> <li>Pulmonary tuberculosis, fibrosis, pneumoconiosis etc</li> </ul>
		<ul> <li>Pleuritis, effusion</li> </ul>
		<ul> <li>Pneumo, haemo and pyothorax</li> </ul>
		Interstitial Lung Disease
		Cystic fibrosis
		• Acute and Chronic obstructive pulmonary disease (conditions leading to)
		• Cor pulmonale
		Acute respiratory failure
		Adult respiratory distress syndrome
		Pulmonary embolism
		Pulmonary Hypertension

Unit	Hours	Content
VII	10	Vascular disorders and nursing management
		<ul> <li>Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, treatment modalities and nursing management of:</li> <li>Disorders of arteries</li> <li>Disorders of the aorta</li> </ul>
		<ul> <li>Disorders of the aorta</li> <li>Aortic Aneurysms,</li> </ul>
		<ul> <li>Aortic dissection</li> </ul>
		Raynaud's phenomenon
		• Peripheral arterial disease of the lower extremities
		• Venous thrombosis
		• Varicose veins
		<ul> <li>Chronic venous insufficiency and venous leg ulcers</li> </ul>
		Pulmonary embolism
VIII	10	Cardio thoracic emergency interventions
		$\Box$ CPR- BLS and ALS
		<ul> <li>Use of ventilator, defibrillator, pacemaker</li> </ul>
		□ Post resuscitation care.
		□ Care of the critically ill patients
		<ul> <li>Psychosocial and spiritual aspects of care</li> </ul>
		<ul> <li>Stress management; ICU psychosis</li> </ul>
		Role of nurse
IX	10	Nursing care of a patient with obstructive airway
		□ Assessment
		<ul> <li>Use of artificial airway</li> <li>Endetrephased intubation trachasetermy and its care</li> </ul>
		Endotracheal intubation, tracheostomy and its care     Complication, minimum suff look, securing tubes
		<ul> <li>Complication, minimum cuff leak, securing tubes</li> </ul>
		Oxygen delivery systems. □ Nasal Cannula
		<ul> <li>Nasal Cannula</li> <li>Oxygen mask, Venturi mask</li> </ul>
		<ul> <li>Partial rebreathing bag</li> </ul>
		□ Bi-PAP and C-PAP masks
		<ul> <li>Uses, advantages, disadvantages, nursing implications of each.</li> </ul>
		Mechanical Ventilation
		Principles of mechanical ventilation
		Types of mechanical ventilation and ventilators.
		Modes of ventilation, advantage, disadvantage, complications.
		D PEEP therapy, indications, physiology, and complications. Weaning off the
		ventilator.
		Nursing assessment and interventions of ventilated patient.

# FNM125202 - CLINICAL SPECIALITY – II

# OBSTETRIC AND GYNAECOLOGICAL NURSING

Placement - II Year

Hours of Instruction Theory: 150 hrs Practical 950 hrs Total 1100 hrs

# **Course Description**

This course is designed to assist the student in developing expertise and in- depth understanding in the field of Obstetric and gynecological Nursing .It will help the student to develop advanced nursing skills for nursing interventions in various obstetrical and gynecological conditions. It will further enable the students to function as midwifery nurse practitioner/ specialist, educator, manager and researcher in the field of obstetric and gynecological nursing.

#### **Objectives**

At the end of the course, the student will be able to:

- 1. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of women with obstetric and gynaecological conditions
- 2. Perform physical, psychosocial, cultural & spiritual assessment
- 3. Demonstrate competence in caring for women with obstetrical and gynaecological conditions
- 4. Demonstrate competence in caring for high risk newborn.
- 5. Identify and Manage obstetrical and neonatal emergencies as per protocol.
- 6. Practice infection control measures
- 7. Utilize recent technology and various diagnostic, therapeutic modalities in the management of obstetrical, gynecological and neonatal care.
- 8. Demonstrate skill in handling various equipments/gadgets used for obstetrical, gynaecological and neonatal care
- 9. Teach and supervise nurses and allied health workers.
- 10. Design a layout of speciality units of obstetrics and gynecology
- 11. Develop standards for obstetrical and gynaecological nursing practice.
- 12. Counsel women and families

# Gokul Nursing Gokul Nursing

- 13. Incorporate evidence based nursing practice and identify the areas of research in the field of obstetrical and gynaecological nursing
- 14. Function as independent midwifery nurse practitioner

# PEDIATRIC ( CHILD HEALTH ) NURSING

Placement: II year

Hours of Instruction Theory: 150 Hours.

Practical: 950 Hours.

Total: 1100 Hours

COURSE DESCRIPTION:

This course is designed to assist students in developing expertise and in- depth understanding in the field of Pediatric Nursing. It will help students to develop advanced skills for nursing intervention in various pediatric medical and surgical conditions. It will enable the student to function as pediatric nurse practitioner/specialist. It will further enable the student to function as educator, manager, and researcher in the field of Paediatric nursing

#### **Objectives**

At the end of the course the students will be able to:

- 1. Apply the nursing process in the care of ill infants to pre adolescents in hospital and community
- 2. Demonstrate advanced skills/competence in nursing management of children with medical and surgical problems
- 3. Recognize and manage emergencies in children
- 4. Provide nursing care to critically ill children
- 5. Utilize the recent technology and various treatment modalities in the management of high risk children
- 6. Prepare a design for layout and describe standards for management of pediatric units/hospitals
- 7. Identify areas of research in the field of pediatric nursing

# PYSCHIATRY ( MENTAL HEALTH ) NURSING

Placement: II year

Hours of Instruction Theory: 150 Hours.

Practical: 950

Hours.

Total: 1100 Hours

# **Course Description**

This course is designed to assist students in developing expertise and in- depth understanding in the field of Psychiatric Nursing. It will help students to develop advanced skills for nursing intervention in various psychiatric conditions. It will enable the student to function as psychiatric nurse practitioner/specialist. It will further enable the student to function as educator, manager, and researcher in the field of Psychiatric nursing

# Objectives

At the end of the course the students will be able to:

- 1. Apply the nursing process in the care of patients with mental disorders in hospital and community
- 2. Demonstrate advanced skills/competence in nursing management of patients with mental disorders
- 3. Identify and care for special groups like children, adolescents, women, elderly, abused and neglected, people living with HIV/AIDS.
- 4. Identify and manage psychiatric emergencies.
- 5. Provide nursing care to critically ill patients with mental disorders
- 6. Utilize the recent technology and various treatment modalities in the management of patients with mental disorders
- 7. Demonstrate skills in carrying out crisis intervention.

— Faculty of Nursing — Gokul Nursing College

- 8. Appreciate the legal and ethical issues pertaining to psychiatric nursing.
- 9. Identify areas of research in the field of psychiatric nursing.
- 10. Prepare a design for layout and describe standards for management of Psychiatric units/emergency units/hospitals
- 11. Teach psychiatric nursing to undergraduate students & in-service nurses.
