FNB180402	Midwifery – 4 weeks				

PROGRAMME OUTCOMES (POs)

A student upon successful completion of Bachelor's degree in nursing should be able to

- 1. Assume responsibilities as professional, competent nurses and midwives in providing promotive, preventive, curative, and rehabilitative services.
- 2. Make independent decisions in nursing situations, protect the rights and facilitate

 Individuals and groups in pursuit of health, function in the hospital, community nursing
 services, and conduct research studies in the areas of nursing practice. They are also
 expected to assume the role of teacher, supervisor and manager in a clinical / public
 health setting.

PROGRAMME SPECIFIC OUTCOMES (PSOs)

- 1. Apply knowledge from physical, biological and behavioral sciences, medicine, including alternative systems and nursing in providing nursing care to individuals, families and communities.
- 2. Demonstrate understanding of life style and other factors, which affect health of individuals and groups.
- 3. Provide nursing care based on steps of nursing process in collaboration with the individuals and groups.
- 4. Demonstrate critical thinking skill in making decisions in all situations in order to provide quality care.
- 5. Utilise the latest trends and technology in providing health care.
- 6. Provide promotive, preventive and restorative health services in line with the national health policies and programs.
- 7. Practice within the framework of code of ethics and professional conduct and acceptable standards of practice within the legal boundaries.
- 8. Communicate effectively with individuals and groups and members of the health team in order to promote effective interpersonal relationships and teamwork.
- 9. Demonstrate skills in teaching to individuals and groups in clinical/community health settings.
- 10. Participate effectively as members of the health team in health care delivery system.
- 11. Demonstrate leadership and managerial skills in clinical / community health settings.
- 12. Conduct need based research studies in various settings and utilize the research findings to improve the quality of care.
- 13. Demonstrate awareness, interest and contribute towards advancement of self and of the profession

SYLLABUS

FNB110401-COMMUNICATIVE ENGLISH

PLACEMENT: I SEMESTER

THEORY: 2 Credits (40 hours)

DESCRIPTION: The course is designed to enable students to enhance their ability to speak and write the language (and use English) required for effective communication in their professional work. Students will practice their skills in verbal and written English during clinical and classroom experience.

COMPETENCIES: On completion of the course, the students will be able to

- 1. Identify the significance of Communicative English for healthcare professionals.
- 2. Apply the concepts and principles of English Language use in professional development such as pronunciation, vocabulary, grammar, paraphrasing, voice modulation, Spelling, pause and silence.
- 3. Demonstrate attentive listening in different hypothetical situations.
- 4. Converse effectively, appropriately and timely within the given context and the individual or team they are communicating with either face to face or by other means.
- 5. Read, interpret and comprehend content in text, flow sheet, framework, figures, tables, reports, anecdotes etc.
- 6. Analyse the situation and apply critical thinking strategies.
- 7. Enhance expressions through writing skills.
- 8. Apply LSRW (Listening, Speaking, Reading and Writing) Skill in combination to learn, teach, educate and share information, ideas and results.

FNB120402- NURSING FOUNDATION-II

PLACEMENT:IISEMESTER

THEORY:6Credits(120 hours)

PRACTICUM: SkillLab: 3Credits(120hours), Clinical: 4Credits(320hours)

DESCRIPTION: This courseisdesigned to help novice nursing students develop knowledge and competencies required to provide evidence-based, comprehensive basic nursing careforadult patients, using nursing process approach.

COMPETENCIES:Oncompletion of the course, the students will be able to

- 1. Developunderstandingaboutfundamentalsofhealthassessmentandperformhealthassess mentinsupervisedclinicalsettings
- 2. Demonstratefundamentalskillsofassessment,planning,implementationandevaluationo fnursingcare usingNursingprocessapproach in supervised clinicalsettings
- $3. \ Assess the Nutritional needs of patients and provide relevant care under supervision$
- 4. Identifyandmeetthehygienicneedsofpatients
- 5. Identifyandmeettheeliminationneedsofpatient
- 6. Interpretfindingsofspecimentestingapplyingtheknowledgeofnormalvalues
- 7. Promoteoxygenationbasedonidentifiedoxygenationneedsofpatientsundersupervision
- 8. Reviewtheconceptoffluid, electrolytebalanceintegrating the knowledge of applied physiology
- 9. Applytheknowledgeoftheprinciples, routes, effects of administration of medications in administering medication
- 10. Calculateconversionsofdrugsanddosageswithinandbetweensystemsofmeasurements
- 11. Demonstrateknowledgeandunderstandingincaringforpatientswithalteredfu nctioningofsenseorgansandunconsciousness
- 12. Explainloss, death and grief
- 13. Describes exual development and sexuality

- 14. Identifystressorsandstressadaptationmodes
- 15. Integratetheknowledgeofcultureandculturaldifferencesinmeetingthespiritualneeds
- 16. Explaintheintroductoryconceptsrelevanttomodels ofhealthandillness inpatientcare

FNB120403- HEALTH/NURSING INFORMATICS & TECHNOLOGY

PLACEMENT:IISEMESTER

THEORY:2Credits(40hours)

PRACTICAL/LAB:1Credit(40hours)

DESCRIPTION: This course is designed to equipnovice nursing students with knowledge and skills necessary to deliver efficient informatics-led health care services.

COMPETENCIES:Oncompletion of the course, the students will be able to

- 1. Developabasicunderstandingofcomputerapplicationinpatientcareandnursingpractice.
- 2. Applytheknowledgeofcomputerandinformationtechnologyinpatientcareandnu rsingeducation,practice,administration andresearch.
- 3. Describetherrinciples of healthinformatics and its use indeveloping efficient health care.
- 4. Demonstrate the use of information system in health carefor patient care and utilization of nursing data.
- 5. DemonstratetheknowledgeofusingElectronicHealthRecords(EHR)systeminclinicalpractice.
- 6. Applytheknowledgeofinteroperabilitystandardsinclinicalsetting.
- 7. Applytheknowledgeofinformationandcommunicationtechnologyinpublichealthpromotion.
- 8. UtilizethefunctionalitiesofNursingInformationSystem(NIS)systeminnursing.
- 9. Demonstratetheskillsofusingdatain managementofhealthcare.
- 10. Applytheknowledge oftheprinciplesofdigitalethicalandlegalissuesinclinical practice.
- 11. Utilizeevidence-basedpracticesininformaticsandtechnologyforprovidingqualitypatientcare.
- 12. Updateandutilizeevidence-basedpracticesinnursingeducation,administration,andpractice.

FNB130401- APPLIED MICROBIOLOGY

THEORY:20hours

PRACTICAL:20hours(Lab/ExperientialLearning–L/E)

DESCRIPTION: This course is designed to enable students to acquire understanding of fundamentals of Microbiology, compare and contrast different microbes and comprehend the means of transmission and control of spread by various microorganisms. It also provides opportunities

for practicing in fection control measures in hospital and community settings.

COMPETENCIES:Oncompletion ofthecourse, the students will be able to:

- 1. Identifytheubiquityand diversityofmicroorganismsin thehumanbodyand theenvironment.
- 2. Classifyandexplainthemorphologyandgrowthofmicrobes.
- 3. Identifyvarioustypesofmicroorganisms.
- 4. Exploremechanismsbywhichmicroorganismscausedisease.
- $5. \ \ Developunderstanding of how the human immune system counteracts in fection by some and the standard properties of the properties$

pecificandnon-specificmechanisms.

- 6. Applytheprinciplesofpreparation and use of vaccines in immunization.
- 7. Identifythecontributionofthemicrobiologist andthemicrobiologylaboratorytothediagnosisofinfection.

FNB130401- INFECTION CONTROL INCLUDING SAFETY

THEORY:20hours

PRACTICAL/LAB:20hours(Lab/ExperientialLearning–L/E)

DESCRIPTION: This course is designed to help students to acquire knowledge and develop competencies required forfundamental patient safety and infection control in delivering patient care. It also focuses on identifying patient safetyindicators, preventingandmanaginghospitalacquired infections, and infollowinguniversalprecautions.

COMPETENCIES: The students will be able to:

- 1. DevelopknowledgeandunderstandingofHospitalacquiredInfections(HAI)andeffectivep racticesforprevention.
- 2. Integratetheknowledgeofisolation(Barrierandreversebarrier)techniquesinimplementin gvariousprecautions.
- 3. DemonstrateandpracticestepsinHandwashingandappropriateuseofdifferenttypesofPPE.
- 4. Illustratevarious disinfection and sterilization methods and techniques.
- 5. Demonstrateknowledgeandskillinspecimencollection,handlingandtransporttooptimizet hediagnosisfortreatment.
- 6. Incorporate the principles and guidelines of Bio Medical wasternangement.
- 7. ApplytheprinciplesofAntibioticstewardshipinperformingthenurses'role.
- 8. Identifypatientsafetyindicatorsand performtheroleofnursein thepatientsafetyauditprocess.
- 9. ApplytheknowledgeofInternationalPatientSafetyGoals(IPSG)inthepatientcaresettings.
- 10. Identify employeesafetyindicatorsandriskofoccupational hazards.
- 11. Developunderstandingofthevarioussafetyprotocolsandadheretothoseprotocols.

FNB130402- PATHOLOGY-I

PLACEMENT:IIISEMESTER

THEORY:1Credit(20hours)(includeslabhoursalso)

DESCRIPTION: This course is designed to enable students to acquire knowledge of pathology of various disease conditions, understanding of genetics, its role in causation and management of defects and diseases and to apply this knowledge in practice of nursing.

COMPETENCIES:Oncompletion of the course, the students will be able to

- 1. Applytheknowledgeofpathologyinunderstandingthedeviationsfromnormal toabnormalpathology.
- 2. Rationalizethevarious laboratoryinvestigationsindiagnosingpathological disorders.
- 3. Demonstrate the understanding of the methods of collection of blood, body cavity fluids, urine and feces for various tests.
- 4. Applytheknowledgeofgeneticsinunderstanding thevariouspathological disorders.
- 5. Appreciate the various manifestations in patients with diagnosed genetical bnormalities.
- 6. Rationalizethespecificdiagnostictests in the detection of genetical normalities.
- 7. Demonstrate the understanding of various services related to genetics

FNB130403- ADULT HEALTH NURSING-I

PLACEMENT: III SEMESTER

THEORY:7Credits(140 hours)

PRACTICUM:Lab/SkillLab(SL)–1 Credit(40hours)Clinical–6Credits(480hours)

DESCRIPTION: This course is designed to equip the students to review and apply their knowledge of Anatomy, Physiology, Biochemistry and Behavioral sciences in caring for adult patients with Medical/Surgical disorders using nursing process approach and critical thinking. It also intends to develop competencies required for assessment, diagnosis, treatment, nursing management, and supportive/palliative caretopatients with various Medical Surgical disorders.

COMPETENCIES:Oncompletion of Medical Surgical Nursing I course, students will be able to

- 1. Explaintheetiology,pathophysiology,manifestations,diagnosticstudies,treatm entsandcomplicationsofcommonmedical and surgical disorders.
- 2. Performcompletehealthassessmenttoestablishadatabaseforprovidingqualitypatien tcareandintegratetheknowledgeofanatomy, physiologyanddiagnostictestsintheprocessofdatacollection.
- 3. Identifynursing diagnoses, list the maccording topriority and formulate nursing careplan.
- 4. Performnursingproceduresskillfullyandapplyscientificprincipleswhilegivingcom prehensivenursingcaretopatients.
- 5. Integrate knowledgeofpathology,nutritionandpharmacologyincaringforpatientsexperiencin gvariousmedicalandsurgicaldisorders.
- 6. Identifycommondiagnosticmeasuresrelatedtothehealthproblemswithemphasisonn ursingassessmentandresponsibilities.
- 7. Demonstrateskillinassisting/performingdiagnosticandtherapeuticprocedures.
- 8. Demonstratecompetencies/skillstopatientsundergoingtreatmentformedicalsurgicaldisorder s.
- 9. Identifythedrugsusedintreatingpatientswithmedicalsurgicalconditions.
- 10. Planandgiverelevantindividualandgroupeducationonsignificantmedicalsurgicaltopics.
- 11. Maintainsafeenvironmentforpatientsandthehealthcarepersonnelinthehospital.
- 12. Integrateevidence-basedinformationwhilegivingnursingcaretopatients.

FNB140401-PHARM ACOLOGY - II

including Fundamentals of Prescribing Module

PLACEMENT: IV SEMESTER **THEORY:** 3 Credits (60 hours)

DESCRIPTION: This course is designed to enable students to acquire understanding of Pharmacodynamics, Pharmacokinetics, principles of therapeutics & nursing implications. Further it develops understanding of fundamental principles of prescribing in students.

COMPETENCIES: On completion of the course, the students will be able to

- 1. Explain the drugs used in the treatment of ear, nose, throat and eye disorders.
- 2. Explain the drugs used in the treatment of urinary system disorders.
- 3. Describe the drugs used in the treatment of nervous system disorders.
- 4. Explain the drugs used for hormonal replacement and for the pregnant women during antenatal, intra natal and postnatal period.
- 5. Explain the drugs used to treat emergency conditions and immune disorders.
- 6. Discuss the role and responsibilities of nurses towards safe administration of drugs used to treat disorders of various systems with basic understanding of pharmacology.
- 7. Demonstrate understanding about the drugs used in alternative system of medicine.
- 8. Demonstrate understanding about the fundamental principles of prescribing.

COURSE OUTLINE

T - Theory

Unit	Time (Hrs)	Learning Outcomes	Content	Teaching/ Learning Activities	Assessment Methods
I	4 (T)		Drugs used in disorders of ear, nose, throat & Eye Antihistamines Topical applications for eye (Chloramphenicol, Gentamycin eye drops), ear (Soda glycerin, boric spirit ear drops), nose and buccal cavity- chlorhexidine mouthwash Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse	 Lecture cum Discussion Drug study/ presentation 	Short answerObjective type
11	4 (T)	Describe drugs acting on urinary system & nurse's responsibilities	Pharmacology of commonly used drugs o Renin angiotensin system o Diuretics and antidiuretics o Drugs toxic to kidney o Urinary antiseptics o Treatment of UTI – acidifiers and alkalinizers Composition, action, dosage, route, indications, contraindications, Drug interactions, side effects, adverse effects toxicity and role of nurse	 Lecture cum Discussion Drug study/ presentation 	Short answerObjective type

			Gujarat Private State University	y Act 4 of 2018)
Ш	Describe drugs used on nervous system & nurse's responsibilities	 Drugs acting on nervous system Basis & applied pharmacology of commonly used drugs Analgesics and anaesthetics Analgesics: Non-steroidal anti- inflammatory (NSAID) drugs Antipyretics Opioids & other central analgesics ✓ General (techniques of GA, pre anesthetic medication) & local anesthetics ✓ Gases: oxygen, nitrous, oxide, carbon-dioxide & others Hypnotics and sedatives Skeletal muscle relaxants Antipsychotics Mood stabilizers 	Lecture cum Discussion Drug study/ presentation	 Short answer Objective type

FNB140401-PATHOLOGY - II AND GENETICS

PLACEMENT: IV SEMESTER

THEORY: 1 Credit (20 hours) (Includes lab hours also)

DESCRIPTION: This course is designed to enable students to acquire knowledge of pathology of various disease conditions, understanding of genetics, its role in causation and management of defects and diseases and to apply this knowledge in practice of nursing.

COMPETENCIES: On completion of the course, the students will be able to

- 1. Apply the knowledge of pathology in understanding the deviations from normal to abnormal pathology
- 2. Rationalize the various laboratory investigations in diagnosing pathological disorders
- 3. Demonstrate the understanding of the methods of collection of blood, body cavity fluids, urine and feces for various tests
- 4. Apply the knowledge of genetics in understanding the various pathological disorders
- 5. Appreciate the various manifestations in patients with diagnosed genetic abnormalities
- 6. Rationalize the specific diagnostic tests in the detection of genetic abnormalities.
- 7. Demonstrate the understanding of various services related to genetics.

FNB140402-ADULT HEALTH NURSING - II WITH INTEGRATED PATHOPHYSIOLOGY including Geriatric Nursing AND PALLIATIVE CARE MODULE

PLACEMENT: IV SEMESTER
THEORY: 7 Credits (140 hours)

PRACTICUM: Lab/Skill Lab (SL): 1 Credit (40 hours) Clinical: 6 Credits (480 hours)

DESCRIPTION: This course is designed to equip the students to review and apply their knowledge of Anatomy, Physiology, Biochemistry and Behavioral sciences in caring for adult patients with Medical/Surgical disorders using nursing process approach. It also intends to develop competencies required for assessment, diagnosis, treatment, nursing management, and supportive/palliative and rehabilitative care to adult patients with various Medical Surgical disorders.

COMPETENCIES: On completion of the course the students will apply nursing process and critical thinking in delivering holistic nursing care with selected Medical and Surgical conditions.

At the completion of Adult Health Nursing II course, students will

- 1. Explain the etiology, pathophysiology, manifestations, diagnostic studies, treatments and complications of selected common medical and surgical disorders.
- 2. Perform complete health assessment to establish a data base for providing quality patient care and integrate the knowledge of diagnostic tests in the process of data collection.
- 3. Identify diagnoses, list them according to priority and formulate nursing care plan.
- 4. Perform nursing procedures skillfully and apply scientific principles while giving comprehensive nursing care to patients.
- 5. Integrate knowledge of anatomy, physiology, pathology, nutrition and pharmacology in caring for patients experiencing various medical and surgical disorders.
- 6. Identify common diagnostic measures related to the health problems with emphasis on nursing assessment and responsibilities.
- 7. Demonstrate skill in assisting/performing diagnostic and therapeutic procedures.
- 8. Demonstrate competencies/skills to patients undergoing treatment for medical surgical disorders.
- 9. Identify the drugs used in treating patients with selected medical surgical conditions.
- 10. Plan and provide relevant individual and group education on significant medical surgical topics.
- 11. Maintain safe environment for patients and the health care personnel in the hospital.

COURSE OUTLINE

T – Theory, L/SL – Lab/Skill Lab

Unit	Time (Hrs)	Learning Outcomes	Content	Teaching/ Learning Activities	Assessment Methods
I	12 (T) 4 (SL)	Explain the etiology, pathophysiology, clinical manifestations, diagnostic measures and medical, surgical, nutritional and nursing management of patients with ENT disorders	Nursing management of patient with disorders of Ear, Nose and Throat (Includes etiology, pathophysiology, clinical manifestations, diagnostic measures and medical, surgical, nutritional and nursing management) Review of anatomy and physiology of the ear, nose and throat History, physical assessment, and diagnostic tests Ear External ear: deformities otalgia, foreign bodies and tumors Middle ear: impacted wax, tympanic, membrane perforation, otitis media, and tumors Inner ear: Meniere's disease, labyrinthitis, ototoxicity tumors Upper respiratory airway infections: Rhinitis, sinusitis, tonsillitis, laryngitis Epistaxis, Nasal obstruction, laryngeal obstruction Deafness and its management	Lecture and discussion Demonstration of hearing aids, nasal packing, medication administration Visit to audiology and speech clinic	 MCQ Short answer Essay OSCE Assessment of skill (using checklist) Quiz Drug book

Unit	Time (Hrs)	Learning Outcomes	Content	Teaching/ Learning Activities	Assessment Methods
П	12 (T) 4 (SL)	Explain the etiology, pathophysiology, clinical manifestations, diagnostic measures and management of patients with disorders of eye Describe eye donation, banking and transplantation	Nursing management of patient with disorder of eye Review of anatomy and physiology of the eye History, physical assessment, diagnostic assessment Eye Disorders Refractive errors Eyelids: infection, deformities Conjunctiva: inflammation and infection bleeding Cornea: inflammation and infection Lens: cataract Glaucoma Retinal detachment Blindness Eye donation, banking and transplantation	 Lecture and discussion Demonstration of visual aids, lens, medication administration Visit to eye bank 	MCQShort EssayOSCEDrug book
Ш	15 (T) 4 (L/SL)	Explain the etiology, pathophysiology, clinical manifestations, diagnostic tests, and medical, surgical, nutritional, and nursing management of Kidney and urinary system disorders Demonstrate skill in genitourinary assessment Prepare patient for genitourinary investigations Prepare and provide health education on prevention of renal calculi	the genitourinary system • History, physical assessment,	 Lecture cum Discussion Demonstration Case Discussion Health education Drug book Field visit – Visits hemodialysis unit 	 MCQ Short Note Long essay Case report Submits health teaching on prevention of urinary calculi

IV	6 (T) Explain the etiology, pathophysiology, clinical manifestations diagnostic tests, and medical, surgical, nutritional, and nursing management of male reproductive disorders	 of male reproductive system Review of Anatomy and physiology of the male reproductive system History, Physical Assessment, Diagnostic tests 	Lecture, DiscussionCase DiscussionHealth education	• Short essay	
----	--	---	--	---------------	--

Unit	Time	Learning Outcomes	Content	Teaching/ Learning Activities	Assessment Methods
	(Hrs)		Orchitis • Sexual dysfunction, infertility, contraception • Male Breast Disorders: gynecomastia, tumor, climacteric changes		
V	10 (T) 4 (SL)	Explain the etiology, pathophysiology, clinical manifestations, types, diagnostic measures and management of patients with disorders of burns/cosmetic surgeries and its significance	Nursing management of patient with burns, reconstructive and cosmetic surgery Review of anatomy and physiology of the skin and connective tissues History, physical assessment, assessment of burns and fluid & electrolyte loss Burns Reconstructive and cosmetic surgery for burns, congenital deformities, injuries and cosmetic purposes, gender reassignment Legal and ethical aspects Special therapies: LAD, vacuumed dressing. Laser, liposuction, skin health rejuvenation, use of derma filters	 Lecture and discussion Demonstration of burn wound assessment, vacuum dressing and fluid calculations Visit to burn rehabilitation centers 	• OSCE • Short notes
VI	16 (T) 4 (L/SL)	Explain the etiology, pathophysiology, clinical manifestations, diagnostic measures and management of patients with neurological disorders	Nursing management of patient with neurological disorders Review of anatomy and physiology of the neurological system History, physical and neurological assessment, diagnostic tests Headache, Head injuries Spinal injuries: Paraplegia, Hemiplegia, Quadriplegia Spinal cord compression: herniation of in vertebral disc Intra cranial and cerebral aneurysms Meningitis, encephalitis, brain, abscess, neuro-cysticercosis Movement disorders: Chorea, Seizures & Epilepsies Cerebrovascular disorders: CVA Cranial, spinal neuropathies: Bell's palsy, trigeminal neuralgia Peripheral Neuropathies Degenerative diseases: Alzheimer's disease, Parkinson's disease	 Lecture and discussion Demonstration of physiotherapy, neuro assessment, tracheostomy care Visit to rehabilitation center, long term care clinics, EEG, NCV study unit, 	OSCEShort notesEssayDrug book
			 Guillain-Barré syndrome, Myasthenia gravis & Multiple sclerosis Rehabilitation of patient with neurological deficit 		

Unit	Time	Learning Outcomes	Content	Teaching/ Learning Activities	Assessment Methods
	(Hrs)			Tietrities	1110413
VII	12 (T) 4 (L/SL)	Explain the etiology, pathophysiology, clinical manifestations, diagnostic tests, and medical, surgical, nutritional, and nursing management of immunological disorders	Nursing management of patients with Immunological problems • Review of Immune system • Nursing Assessment: History and Physical assessment • HIV & AIDS: Epidemiology, Transmission, Prevention of Transmission and management of HIV/AIDS	 Lecture, discussion Case Discussion/ seminar Refer Module on HIV/AIDS 	
		Prepare and provides health education on prevention of HIV infection and rehabilitation Describe the national infection control programs	 Role of Nurse; Counseling, Health education and home care consideration and rehabilitation National AIDS Control Program – NACO, various national and international agencies for infection control 		
VIII	12 (T) 4 (L/SL)	Explain the etiology, pathophysiology, types, clinical manifestations, staging, diagnostic measures and management of patients with different cancer, treatment modalities including newer treatments	Nursing management of patient with Oncological conditions Structure and characteristics of normal and cancer cells History, physically assessment, diagnostic tests Prevention screening early detections warning sign of cancer Epidemiology, etiology classification, Pathophysiology, staging clinical manifestations, diagnosis, treatment modalities and medical and surgical nursing management of Oncological condition Common malignancies of various body system eye, ear, nose, larynx, breast, cervix, ovary, uterus, sarcoma, renal, bladder, kidney, prostate Brain, Spinal cord. Oncological emergencies Modalities of treatment: Chemotherapy, Radiotherapy: Radiation safety, AERB regulations, Surgical intervention, Stem cell and bone marrow transplant, Immunotherapy, Gene therapy Psychological aspects of cancer: anxiety, depression, insomnia, anger Supportive care Hospice care	Lecture and discussion Demonstration of chemotherapy preparation and administration Visit to BMT, radiotherapy units (linear accelerator, brachytherapy, etc.), nuclear medicine unit Completion of palliative care module during clinical hours (20 hours)	 OSCE Essay Quiz Drug book Counseling, health teaching

Unit	Time	Learning Outcomes	Content	Teaching/ Learning Activities	Assessment Methods
	(Hrs)			Activities	Wicthous
IX	15 (T) 4 (L/SL)	Explain the types, policies, guidelines, prevention and management of disaster and the etiology, pathophysiology, clinical manifestations, diagnostic measures and management of patients with acute emergencies	Nursing management of patient in Emergency and Disaster situations Disaster Nursing Concept and principles of disaster nursing, Related Policies Types of disaster: Natural and manmade Disaster preparedness: Team, guidelines, protocols, equipment, resources Etiology, classification, Pathophysiology, staging, clinical manifestation, diagnosis, treatment modalities and medical and surgical nursing management of patient with medical and surgical emergencies — Poly trauma, Bites, Poisoning and Thermal emergencies Principles of emergency management Medico legal aspects	 Lecture and discussion Demonstration of disaster preparedness (Mock drill) and triaging Filed visit to local disaster management centers or demo by fire extinguishers Group presentation (role play, skit, concept mapping) on different emergency care Refer Trauma care management/ATCN module Guided reading on National Disaster Management Authority (NDMA) guidelines 	OSCE Case presentations and case study
X	10 (T)	Explain the Concept, physiological changes, and psychosocial problems of ageing Describe the nursing management of the elderly	 Nursing care of the elderly History and physical assessment Aging process and age-related body changes and psychosocial aspects Stress and coping in elder patient Psychosocial and sexual abuse of elderly Role of family and formal and nonformal caregivers Use of aids and prosthesis (hearing aids, dentures) Legal and ethical issues National programs for elderly, privileges, community programs and health services Home and institutional care 	Lecture and discussion Demonstration of communication with visual and hearing impaired Field visit to old age homes	 OSCE Case presentations Assignment on family systems of India focusing on geriatric population
XI	15 (T) 8 (L/SL)	Explain the etiology, pathophysiology, clinical manifestations, diagnostic measures and management of patients in critical care units	Nursing management of patients in critical Care units • Principles of critical care nursing • Organization: physical set-up, policies, staffing norms • Protocols, equipment and supplies	Lecture and discussion Demonstration on the use of mechanical ventilators, cardiac monitors etc.	 Objective type Short notes Case presentations Assessment of skill on monitoring of

Gokul Nursing College

Clinical practice in

Unit	Time (Hrs)	Learning Outcomes	Content	Teaching/ Learning Activities	Assessment Methods
			 Use and application of critical care biomedical equipment: ventilators, cardiac monitors, defibrillators, infusion pump, Resuscitation equipment and any other Advanced Cardiac Life support Nursing management of critically ill patient Transitional care Ethical and Legal Aspects Breaking Bad News to Patients and/or their families: Communication with patient and family End of life care 	different ICUs	patients in ICU. • Written assignment on ethical and legal issues in critical care
XII	5 (T)	Describe the etiology, pathophysiology, clinical manifestations, diagnostic measures and management of patients with occupational/industrial health disorders	Nursing management of patients occupational and industrial disorders • History, physical examination, Diagnostic tests • Occupational diseases and management	 Lecture and discussion Industrial visit 	• Assignment on industrial health hazards

(Recognized by UGC under Section 22 & 2(f) of 1956 (Gujarat Private State University Act 4 of 2018)

CLINICAL PRACTICUM

CLINICAL PRACTICUM: 6 Credits (480 Hours) - 20 weeks × 24 hours

PRACTICE COMPETENCIES: On completion of the clinical practicum, the students will develop proficiency in applying nursing process and critical thinking in rendering holistic nursing care including rehabilitation to the adult/geriatric patients admitted in Critical Care Units, undergoing cosmetic and reconstructive surgery and with selected medical & surgical disorders of ear, nose, throat, eye, Genitourinary, reproductive, immunologic, nervous systems and in emergency/disaster conditions.

The students will be competent to

- 1. Utilize the nursing process in providing care to the sick adults in the hospital
 - a. Perform complete health assessment to establish a data base for providing quality patient care.
 - b. Integrate the knowledge of diagnostic tests in patient assignment.
 - c. Identify nursing diagnoses and list them according to priority.
 - d. Formulate nursing care plan, using problem solving approach.
 - e. Apply scientific principles while giving nursing care to patients.
 - f. Develop skill in performing nursing procedures applying scientific principle.
 - g. Establish/develop interpersonal relationship with patients and family members.
 - h. Evaluate the expected outcomes and modify the plan according to the patient needs.
- 2. Provide comfort and safety to adult patients in the hospital.
- 3. Maintain safe environment for patients during hospitalization.
- 4. Explain nursing actions appropriately to the patients and family members.
- 5. Ensure patient safety while providing nursing procedures.
- 6. Assess the educational needs of the patient and their family related to medical and surgical disorders and provide appropriate health education to patients.
- 7. Provide pre, intra and post-operative care to patients undergoing surgery.
- Integrate knowledge of pathology, nutrition and pharmacology for patients experiencing selected medical and surgical disorders.
- 9. Integrate evidence-based information while giving nursing care to patients.
- 10. Demonstrate the awareness of legal and ethical issues in nursing practice.
- I. Nursing Management of Patients with ENT Disorders

A. Skill Lab

Use of manikins and simulators

- Tracheostomy care
- Instilling Ear and Nasal medications
- Bandage application

B. Clinical Postings

Clinical area/unit	Duration (weeks)	Learning Outcomes	Procedural Competencies/ Clinical Skills	Clinical Requirements	Assessment Methods

Clinical	Duration (weeks)	Learning	Procedural Competencies/	Clinical	Assessment
area/unit		Outcomes	Clinical Skills	Requirements	Methods
Renal ward/ nephrology ward including Dialysis unit	2	Develop skill in Management of patients with urinary, male reproductive problems	 Assessment of kidney and urinary system History taking Physical examination Testicular self-examination digital rectal exam Preparation and assisting with diagnostic and therapeutic procedures Cystoscopy, Cystometrogram, Contrast studies: IVP etc. Peritoneal dialysis Hemodialysis, Lithotripsy Specific tests: Semen analysis, gonorreoea test, Renal/ Prostate Biopsy etc. Catheterization: care Bladder irrigation I/O recording and monitoring Ambulation and exercise 	 Assessment – 1 Drug presentation – 1 Care study/ Clinical presentation – 1 Preparing and assisting in hemodialysis 	 Clinical evaluation Care plan OSCE Quiz Drug presentation

IV. Nursing Management of Patients with Burns and Reconstructive Surgery

A. Skill Lab

Use of manikins and simulators

- Assessment of burns wound
- Wound dressing

B. Clinical Postings

Clinical area/unit	Duration (weeks)	Learning Outcomes	Procedural Competencies/ Clinical Skills	Clinical Requirements	Assessment Methods
Burns unit/ reconstructive surgical unit	2	Develop skill in burns assessment and providing care to patients with different types of burns	 Assessment of burns First aid of burns Fluid & electrolyte replacement therapy Skin care 	 burn wound assessment – 1 care study/case presentation – 1 	 Clinical evaluation , Care study/case report
		Develop skill in providing care to patients with different types of cosmetic and reconstructive surgeries	 Care of Burn wounds Bathing Dressing Pre-operative and post-operative care of patients Caring of skin graft and post cosmetic surgery Rehabilitation 		

V. Nursing Management of Patients with neurological disorders

A. Skill Lab

Use of manikins and simulators

- Range of motion exercises
- Muscle strengthening exercises
- Crutch walking

B. Clinical Postings

Clinical	Duration	Learning	Procedural Competencies/ Clinical	Clinical	Assessment
area/unit	(weeks)	Outcomes	Skills	Requirements	Methods
Neurology - medical/ Surgery wards	3	Develop skill in Management of patients with Neurological problems	 History taking; Neurological Examination Patient monitoring Prepare and assist for various invasive and non-invasive diagnostic procedures Range of motion exercises, muscle strengthening Care of medical, surgical and rehabilitative patients 	euro- assessment -1 Case study/ case presentation - 1 Drug presentation - 1	 Clinical evaluation Neuro assessment OSCE Case report/presentations

VI. Nursing Management of Patients with Immunological Disorders

A. Skill Lab

- Barrier Nursing
- Reverse Barrier Nursing

B. Clinical Postings

Clinical	Duration (weeks)	Learning	Procedural Competencies/ Clinical	Clinical	Assessment
area/unit		Outcomes	Skills	Requirements	Methods
Isolation ward/ Medical ward	1	Develop skill in the Management of patients with immunological disorders	 History taking Immunological status assessment (e.g. HIV) and Interpretation of specific tests Caring of patients with low immunity Practicing of standard safety measures, precautions/barrier nursing/reverse barrier/isolation skills 	 Assessment of immune status Teaching of isolation to patient and family care givers Nutritional management Care Note – 1 	Care noteQuizHealth Teaching

VII. Nursing Management of Patients with disorders of Oncological conditions

A. Skill Lab

Use of manikins and simulators

- Application of topical medication
- Administration of chemotherapy

B. Clinical Postings

Clinical	Duration	Learning	Procedural Competencies/	Clinical	Assessment
area/unit	(weeks)	Outcomes	Clinical Skills	Requirements	Methods
Oncology wards (including day care radiotherapy unit)	3	Develop skill in providing care to patients with oncological disorders	 History taking & physical examination of cancer patients Screening for common cancers: TNM classification Preparation, assisting and after care patients undergoing diagnostic procedures Biopsies/FNAC Pap smear Bone-marrow aspiration Various modalities of treatment Chemotherapy Radiotherapy Pain management Stoma therapy Immuno therapy Gene therapy Alternative therapy Stoma care and feeding Caring of patients treated with nuclear medicine Rehabilitation 	 Assessment – 1 Care study/clinical presentation – 1 Pre and post-operative care of patient with various modes of cancer treatment Teaching on BSE to family members Visit to palliative care unit 	 Clinical evaluation Care study Quiz Drug book

VIII. Nursing Management of Patients in emergency conditions

A. Skill Lab

Use of manikins and simulators

- Assessment: primary and secondary survey
- Trauma care: bandaging, wound care, splinting, positions

B. Clinical Postings

Clinical area/unit	Duration (weeks)	Learning Outcomes	Procedural Competencies/ Clinical Skills	Clinical Requirements	Assessment Methods
Emergency room/ Emergency unit	2	Develop skill in providing care to patients with emergency health problems	 Practicing _triage' Primary and secondary survey in emergency Examination, investigations & their interpretations, in emergency & disaster situations Emergency care of medical and traumatic injury patients Documentations, assisting in legal procedures in emergency unit Managing crowd Counseling the patient and family in dealing with grieving & bereavement 	 Triage Immediate care Use of emergenc y trolley 	Clinical evaluationQuiz

IX. Nursing Management of geriatric patients

A. Skill Lab

Use of manikins and simulators

• Use of assistive safety devices

B. Clinical Postings

Clinical area/unit	Learning Outcomes	Procedural Competencies / Clinical Skills	Clinical Requirements	Assessment Methods
Geriatric ward	Develops skill in geriatric assessment and providing care to patients with geriatric illness	History taking and assessment of Geriatric patient	 Geriatric assessment – 1 Care of normal and geriatric patient with illness Fall risk assessment – 1 Functional status assessment – 1 	Clinical evaluationCare plan

X. Nursing Management of Patients in critical care units

A. Skill Lab

Use of manikins and simulators

- Assessment critically ill
- ET tube set up –suction
- TT suction
- Ventilator set up
- Chest drainage

Bag mask ventilation

- Central & Peripheral line
- Pacemaker

B. Clinical Postings

Clinical area/unit	Duratio n (weeks)	Learning Outcomes	Procedural Competencies/ Clinical Skills	Clinical Requirements	Assessment Methods
Critical Care Unit	2	Develop skill in assessment of critically ill and providing care to patients with critical health conditions	 Assessment of critically ill patients Assisting in arterial puncture, ET tube intubation & extubation ABG analysis & interpretation - respiratory acidosis, respiratory alkalosis, metabolic acidosis, metabolic acidosis, metabolic alkalosis Setting up of Ventilator modes and settings and care of patient on a ventilator Set up of trolley with instruments Monitoring and maintenance of Chest drainage system Bag and mask ventilation Assisting and maintenance of Central and peripheral lines invasive Setting up of infusion pump, defibrillator, Drug administration-infusion, intracardic, intrathecal, epidural, Monitoring pacemaker ICU care bundle Management of the dying patient in the ICU 	Hemodynami c monitoring Different scales used in ICU Communicating with critically ill patients	 Clinical evaluation OSCE RASS scale assessment Use of VAE bundle VAP, CAUTI, BSI Case Presentation

FNB140403- PROFESSIONALISM, PROFESSIONAL VALUES & ETHICS INCLUDING

BIOETHICS PLACEMENT: IV SEMESTER

THEORY: 1 Credit (20 hours)

DESCRIPTION: This course is designed to help students to develop an understanding of professionalism and demonstrate professional behavior in their workplace with ethics and professional values. Further the students will be able to identify ethical issues in nursing practice and participate effectively in ethical decision making along with health team members.

COMPETENCIES: On completion of this course, the students will be able to

- 1. Describe profession and professionalism.
- 2. Identify the challenges of professionalism.
- 3. Maintain respectful communication and relationship with other health team members, patients and society.
- 4. Demonstrate professional conduct.
- 5. Describe various regulatory bodies and professional organizations related to nursing.
- 6. Discuss the importance of professional values in patient care.
- 7. Explain the professional values and demonstrate appropriate professional values in nursing practice.
- 8. Demonstrate and reflect on the role and responsibilities in providing compassionate care in the healthcare setting.
- 9. Demonstrate respect, human dignity and privacy and confidentiality to self, patients and their caregivers and other health team members.
- 10. Advocate for patients' wellbeing, professional growth and advancing the profession.
- 11. Identify ethical and bioethical concerns, issues and dilemmas in nursing and healthcare.
- 12. Apply knowledge of ethics and bioethics in ethical decision making along with health team members.
- 13. Protect and respect patient's rights.

FNB150401- CHILD HEALTH NURSING - I

PLACEMENT: V SEMESTER **THEORY:** 3 Credits (60 hours)

PRACTICUM: Lab/Skill Lab: 1 Credit (40 hours) Clinical: 2 Credits (160 hours)

DESCRIPTION: This course is designed for developing an understanding of the modern approach to child-care, identification, prevention and nursing management of common health problems of neonates and children.

COMPETENCIES: On completion of the course, the students will be able to

- 1. Develop understanding of the history and modern concepts of child health and child-care.
- 2. Explore the national child welfare services, national programs and legislation in the light of National Health Policy 2017.
- 3. Describe the role of preventive pediatrics and perform preventive measures towards accidents.
- 4. Participate in national immunization programs/Universal Immunization Program (UIP).
- 5. Identify the developmental needs of children and provide parental guidance.
- 6. Describe the principles of child health nursing and perform child health nursing procedures.
- 7. Demonstrate competencies in newborn assessment, planning and implementation of care to normal and high-risk newborn including neonatal resuscitation.
- 8. Apply the principles and strategies of Integrated management of neonatal and childhood illness (IMNCI).
- 9. Apply the knowledge of pathophysiology and provide nursing care to children with respiratory system disorders.
- 10. Identify and meet childhood emergencies and perform child CPR.

CHILD HEALTH NURSING - I & II CLINICAL (3 Credits – 240 hours)

PLACEMENT: V & VI SEMESTER

PRACTICUM: Skill Lab: 1 Credit (40 hours) **Clinical:** V SEMESTER – 2 Credits (160 hours)

PRACTICE COMPETENCIES: On completion of the course, the students will be able to

- 1. Perform assessment of children: health, developmental & anthropometric.
- 2. Provide nursing care to children with various medical disorders.

VI SEMESTER – 1 Credit (80 hours)

- 3. Provide pre & postoperative care to children with common pediatric surgical conditions/ malformation.
- 4. Perform immunization as per NIS.
- 5. Provide nursing care to critically ill children.
- 6. Give health education/nutritional education to parents.
- 7. Counsel parents according to identified counseling needs.

Skill Lab

Use of Manikins and Simulators

PLS, CPAP, Endotracheal Suction

Pediatric Nursing Procedures:

- Administration of medication Oral, IM & IV
- Oxygen administration
- Application of restraints
- Specimen collection
- Urinary catheterization and drainage
- Ostomy care
- Feeding NG, gastrostomy, Jejunostomy
- Wound dressing
- Suture removal

CLINICAL POSTINGS

8 weeks × 30 hours per week (5 weeks + 3 weeks)

Clinical area/unit	Duration (Weeks)	Learning Outcomes	Procedural Competencies/ Clinical Skills	Clinical Requirements	Assessment Methods
Pediatric Medical Ward	V Sem – 2 weeks VI Sem – 1 week	Provide nursing care to children with various medical disorders	 Taking pediatric history Physical examination & assessment of children Administration of oral, I/M, & I/V medicine/fluids Calculation of fluid replacement Preparation of different strengths of I/V fluids Application of restraints Administration of O2 inhalation by different methods Baby bath/sponge bath Feeding children by Katori spoon, Paladai cup Collection of specimens for common investigations Assisting with common diagnostic procedures Teaching mothers/ parents o Malnutrition o Oral rehydration therapy o Feeding & Weaning o Immunization schedule Play therapy 	 Nursing care plan – 1 Case study presentation – 1 Health talk – 1 	Assess performance with rating scale Assess each skill with checklist OSCE/OSPE Evaluation of case study/ presentation & health education session Completion of activity record

FNB150402- MENTAL HEALTH NURSING - I

PLACEMENT: V SEMESTER **THEORY:** 3 Credits (60 hours)

PRACTICUM: Clinical: 1 Credit (80 hours)

DESCRIPTION: This course is designed to develop basic understanding of the principles and standards of mental health nursing and skill in application of nursing process in assessment and care of patients with mental health disorders.

COMPETENCIES: On completion of the course, the students will be competent to

- 1. Trace the historical development of mental health nursing and discuss its scope.
- 2. Identify the classification of the mental disorders.
- 3. Develop basic understanding of the principles and concepts of mental health nursing.
- 4. Apply the Indian Nursing Council practice standards for psychiatric mental health nursing in supervised clinical settings.
- 5. Conduct mental health assessment.
- 6. Identify and maintain therapeutic communication and nurse patient relationship.
- 7. Demonstrate knowledge of the various treatment modalities and therapies used in mental disorders.
- 8. Apply nursing process in delivering care to patients with mental disorders.
- Provide nursing care to patients with schizophrenia and other psychotic disorders based on assessment findings and treatment/therapies used.
- 10. Provide nursing care to patients with mood disorders based on assessment findings and treatment/therapies used.
- 11. Provide nursing care to patients with neurotic disorders based on assessment findings and treatment/ therapies used.

COURSE OUTLINE

FNB150403- COMMUNITY HEALTH NURSING-I Including Environmental Science & Epidemiology

PLACEMENT: V SEMESTER

THEORY: 5 Credits (100 hours) includes Lab hours also

PRACTICUM: Clinical: 2 Credits (160 hours)

DESCRIPTION: This course is designed to help students develop broad perspectives of health, its determinants, about community health nursing and understanding about the health care delivery services, health care policies and regulations in India. It helps the students to develop knowledge and understanding of environmental science. It further helps them to apply the principles and concepts of BCC and health education for health promotion and maintenance of health within the community in wellness and illness continuum. It helps students to practice Community Health Nursing for the individuals, family and groups at rural, urban and tribal settings by applying principles of community health nursing and epidemiological approach. It also helps the students to develop knowledge and competencies required to screen, assess, diagnose, manage and refer clients appropriately in various health care settings. It prepares the students to provide primary healthcare to clients of all ages in the community, DH, PHC, CHC, SC/HWC and develop beginning skills in participating in all the National Health Programs.

COMPETENCIES: On completion of the course, the students will be able to

- 1. Explore the evolution of public health in India and community health nursing
- 2. Explain the concepts and determinants of health
- 3. Identify the levels of prevention and health problems of India
- 4. Develop basic understanding about the health care planning and the present health care delivery system in India at various levels
- 5. Locate the significance of primary health care and comprehensive primary health care as part of current health care delivery system focus
- 6. Discuss health care policies and regulations in India
- 7. Demonstrate understanding about an overview of environmental science, environmental health and sanitation
- 8. Demonstrate skill in nutritional assessment for different age groups in the community and provide appropriate nutritional counseling
- 9. Provide health education to individuals and families applying the principles and techniques of behavior change appropriate to community settings
- 10. Describe community health nursing approaches and concepts
- 11. Describe the role and responsibilities of community health nursing personnel
- 12. Utilize the knowledge and skills in providing comprehensive primary health care across the life span at various settings
- 13. Make effective home visits applying principles and methods used for home visiting
- 14. Use epidemiological approach in community diagnosis
- 15. Utilize the knowledge of epidemiology, epidemiological approaches in caring for people with communicable and non-communicable diseases
- 16. Investigate an epidemic of communicable diseases
- 17. Assess, diagnose, manage and refer clients for various communicable and non- communicable diseases appropriately at the primary health care level
- 18. Identify and perform the roles and responsibilities of nurses in implementing various national health programs in the community for the prevention, control and management of communicable and non-communicable diseases particularly in screening, identification, primary management and referral to a health facility/First Referral Unit (FRU)

COURSE OUTLINE

T - Theory

Unit	Time	Learning Outcomes	Content	Teaching/Learning	Assessment
	(Hrs)			Activities	Methods
I	4 (T)	Define public health, community health and community health nursing Explain the evolution of public health in India and scope of community health nursing Explain various concepts of health and disease, dimensions and determinants of health Explain the natural history of disease and levels of prevention Discuss the health problems of India	Concepts of Community Health and Community Health Nursing • Definition of public health, community health and community health nursing • Public health in India and its evolution and Scope of community health nursing • Review: Concepts of Health & Illness/ disease: Definition, dimensions and determinants of health and disease • Natural history of disease Levels of prevention: Primary, Secondary & tertiary prevention — Review	 Lecture Discussion Explain using chart, graphs Community needs assessment (Field survey on identification of demographic characteristics, health determinants and resources of a rural and an urban community) Explain using examples 	 Short answer Essay Objective type Survey report
II	8 (T)	Describe health planning and its steps, and various health plans, and committees Discuss health care delivery system in India at various levels	 Health problems (Profile) of India Health Care Planning and Organization of Health Care at various levels Health planning steps Health planning in India: various committees and commissions on health and family welfare and Five Year plans Participation of community and stakeholders in health planning Health care delivery system in India: Infrastructure and Health sectors, Delivery of health services at sub-centre (SC), PHC, CHC, District level, state level and national level 	 Lecture Discussion Field visits to CHC, PHC, SC/ Health Wellness Centers (HWC) 	 Short answer Essay Evaluation of Field visit reports & presentation
		Describe SDGs, primary health care	 Sustainable development goals 		

— Faculty of Nursing ——Gokul Nursing College

				(Gujarat Private State University A	Act 4 of 2018)
		and comprehensive primary health care (CPHC)	(SDGs), Primary Health Care and Comprehensive Primary Health Care (CPHC): elements, principles		
			• CPHC through SC/Health Wellness Center (HWC)		
		Explain health care policies and regulations in India	 Role of MLHP/CHP National Health Care Policies and Regulations 		
			o National Health Policy (1983, 2002, 2017)		
			o National Health Mission (NHM): National Rural Health Mission (NRHM), National Urban Health Mission (NUHM), NHM		
			o National Health Protection Mission (NHPM)		
	15	Identify the value of an	o Ayushman Bharat Universal Health Coverage	A Leature Discussion	a Chart mann
III	15 (T)	Identify the role of an individual in the conservation of natural resources	Environmental Science, Environmental Health, and Sanitation • Natural resources: Renewable and non- renewable resources, natural resources and associated problems: Forest resources, water resources, mineral resources, food resources, energy resources and land resources	 Lecture Discussion Debates on environmental protection and preservation Explain using Charts, graphs, Models, films, slides 	 Short answer Essay Field visit reports
			• Role of individuals in conservation of natural resources, and equitable use of resources for sustainable lifestyles		
		Describe ecosystem, its structure, types and functions	• Ecosystem: Concept, structure and functions of ecosystems, Types & Characteristics – Forest ecosystem, Grassland ecosystem, Desert		

 _		(eajarat i iii ate etate eiii eiit) ;	
	ecosystem, Aquatic ecosystem, Energy flow in ecosystem		

Unit	Time	Learning Outcomes	Content	Teaching/Learning	Assessment Methods
Unit	(Hrs)			Activities	Methods
		Explain the classification, value and threats to biodiversity Enumerate the causes, effects and control measures of environmental pollution	Biodiversity: Classification, value of bio-diversity, threats to biodiversity, conservation of biodiversity Environmental pollution: Introduction, causes, effects and control measures of Air pollution, Water pollution, Soil pollution, Marine pollution, Noise pollution, Thermal pollution, nuclear hazards & their impact on health		
			• Climate change, global warming: ex. heat wave, acid rain, ozone layer depletion, waste land reclamation & its impact on health		
		Discuss about climate change, global warming, acid rain, and ozone layer depletion	• Social issues and environment: sustainable development, urban problems related to energy, water and environmental ethics	 Directed reading Visits to water supply & purification sites Observe rain water harvesting 	
	an individual in creating awarenes about the social is related to environ List the Acts relat	Enumerate the role of an individual in creating awareness about the social issues related to environment List the Acts related to environmental	• Acts related to environmental protection and preservation Environmental Health & Sanitation	plants	
		protection and preservation	 Concept of environment health and sanitation 		
		Describe the concept of environmental health and sanitation	• Concept of safe water, sources of water, waterborne diseases, water purification processes, household purification of water		
			 Physical and chemical standards of drinking water quality and tests for assessing bacteriological quality of water 		

Approved By Govt. of Gujarat (Recognized by UGC under Section 22 & 2(f) of 1956)

				(Gujarat Private State University A	

Unit	Time	Learning Outcomes	Content	Teaching/Learning	Assessment Methods
	(Hrs)			Activities	Witting
		Describe water conservation, rain water harvesting and water shed management Explain waste management	 Concepts of water conservation: rain water harvesting and water shed management Concept of Pollution prevention Air & noise pollution Role of nurse in prevention of pollution Solid waste management, human excreta disposal & management and sewage disposal and management 	Visit to sewage disposal and treatment sites, and waste disposal sites	
			 Commonly used insecticides and pesticides 		
IV	7 (T)	Describe the various nutrition assessment methods at the community level Plan and provide diet plans for all age groups including therapeutic diet	Nutrition Assessment and Nutrition Education • Review of Nutrition • Concepts, types • Meal planning: aims, steps & diet plan for different age groups • Nutrition assessment of individuals, families and community by using appropriate	 Lecture Discussion Demonstration Role play Market visit Nutritional assessment for different age groups 	 Performance assessment of nutrition assessment for different age groups Evaluation on nutritional assessment reports
		Provide nutrition counseling and education to all age groups and describe	methods • Planning suitable diet for individuals and families according to local availability of foods, dietary habits and economic status • General nutritional advice • Nutrition education: purpose, principles & methods and Rehabilitation	LectureDiscussion	 Short answer Essay

Unit	Time	Learning Outcomes	Content	Teaching/Learning	Assessment
	(Hrs)			Activities	Methods
		the national nutrition programs and	• Review: Nutritional deficiency disorders		
		Identify early the food borne diseases, and perform initial	 National nutritional policy & programs in India 		
		management and referral appropriately	Food Borne Diseases and Food Safety		
			Food borne diseases Definition, & burden, Causes and classification Signs & Symptoms Transmission of food borne pathogens & toxins Early identification, initial management and referral Food poisoning & food intoxication Epidemiological features/clinical characteristics, Types of food poisoning Food intoxication-features, preventive & control measures Public health response to food borne diseases	 Field visits to milk purification plants, slaughterhouse Refer Nutrition module-BPCCHN Block 2-unit I & UNIT 5 	• Field visit reports

V 6 (T) Describe behaviour change communication skills Behaviour change communication Behaviour change communication skills communication o Human behaviour • Lecture • Discussion • Role play • Demonstration: BCC skills • Supervised field practice • Refer: BCC/SBCC	Short answerEssay
communication skills Behaviour change communication skills communication skills communication Behaviour change communication skills communication Behaviour change communication Role play Demonstration: BCC skills Supervised field practice	• Essay
communication skills communication Supervised field practice	
o Health belief model: concepts & definition, ways to influence behaviour	
Counsel and provide health education to individuals, families and community for promotion of healthy life style practices O Steps of behaviour change: Guiding principles in planning BCC activity O Steps of BCC O Social and Behaviour Change Communication strategies (SBCC): techniques to collect social history from clients O Barriers to effective	• Performance evaluation of health

Unit	Time	Learning Outcomes	Content	Teaching/Learning	Assessment Methods
	(Hrs)			Activities	Methods
		using appropriate methods and media	communication, and methods to overcome them • Health promotion and Health education: methods/techniques, and audio-visual aids		education sessions to individuals and families
VI	7 (T)	Describe community	Community health	• Lecture	• Short answer
		health nursing approaches and	nursing approaches,	• Discussion	• Essays
		concepts	concepts, roles and	Demonstration	
			responsibilities of community health	• Role plays	
		Describe and identify the activities of community health nurse to promote and maintain family health through home visits	nursing personnel Approaches: Nursing process Epidemiologica l approach Problem solving approach Evidence based approach Empowering people to care for themselves Review: Primary health care and Comprehensive Primary Health Care (CPHC) Home Visits: Concept, Principles, Process, & Techniques: Bag technique Qualities of Community HealthNurse Roles and responsibilities of community health nursing personnel in family health services Review: Principles & techniques of counseling	• Supervised field practice	Assessment of supervised field practice
VII	10 (T)	Explain the specific activities of	Assisting individuals	• Lecture	Short answer
		community health	and families to promote and maintain their	• Discussion	• Essay
		nurse in assisting individuals and	health A. Assessment of individuals	• Demonstration	Assessment of clinical
		groups to promote and maintain their health	and families (Review from Child health nursing, Medical surgical nursing and OBG Nursing)	• Role plays	performance in the field practice area

FNB150404- EDUCATION TECHNOLOGY/ NURSING EDUCATION

PLACEMENT: V SEMESTER **THEORY:** 2 Credits (40 hours)

PRACTICUM: Lab/Practical: 1 Credit (40 hours)

DESCRIPTION: This course is designed to help the students to develop knowledge, attitude and beginning competencies essential for applying basic principles of teaching and learning among individuals and groups both in educational and clinical settings. It also introduces basics of curriculum planning and organization. It further enables students to participate actively in team and collaborative learning.

COMPETENCIES: On completion of the course, the students will be competent to

- 1. Develop basic understanding of theoretical foundations and principles of teaching and learning
- 2. Identify the latest approaches to education and learning
- 3. Initiate self- assessment to identify one's own learning styles
- 4. Demonstrate understanding of various teaching styles that can be used, based on the learners' readiness and generational needs
- 5. Develop understanding of basics of curriculum planning, and organizing
- 6. Analyze and use different teaching methods effectively that are relevant to student population and settings
- 7. Make appropriate decisions in selection of teaching learning activities integrating basic principles
- 8. Utilize active learning strategies that enhance critical thinking, team learning and collaboration
- 9. Engage in team learning and collaboration through inter professional education
- 10. Integrate the principles of teaching and learning in selection and use of educational media/technology
- 11. Apply the principles of assessment in selection and use of assessment and evaluation strategies
- 12. Construct simple assessment tools/tests integrating cognitive, psychomotor and affective domains of learning that can measure knowledge and competence of students
- 13. Develop basic understanding of student guidance through mentoring and academic advising
- 14. Identify difficult situations, crisis and disciplinary/grievance issues experienced by students and provide appropriate counseling
- 15. Engage in ethical practice in educational as well as clinical settings based on values, principles and ethical standards
- 16. Develop basic understanding of evidence-based teaching practices

FNB150405- INTRODUCTION TO FORENSIC NURSING AND INDIAN LAWS

PLACEMENT: V SEMESTER **THEORY:** 1 Credit (20 hours)

DESCRIPTION: This course is designed to help students to know the importance of forensic science in total patient care and to recognize forensic nursing as a specialty discipline in professional nursing practice.

COMPETENCIES: On completion of the course, the students will be able to

- 1. Identify forensic nursing as an emerging specialty in healthcare and nursing practice
- 2. Explore the history and scope of forensic nursing practice
- 3. Identify forensic team, role and responsibilities of forensic nurse in total care of victim of violence and in preservation of evidence
- 4. Develop basic understanding of the Indian judicial system and legal procedures

COURSE OUTLINE

SYLLABUS

FNB160401- Child Health Nursing II

PLACEMENT: VI SEMESTER

THEORY: 2 Credits (40 hours)

PRACTICUM: Clinical: 1 Credit (80 hours)

DESCRIPTION: This course is designed for developing an understanding of the modern approach to child-care, identification, prevention and nursing management of common health problems of neonates and children.

COMPETENCIES: On completion of the course, the students will be able to

- 1. Apply the knowledge of pathophysiology and provide nursing care to children with Cardiovascular, GI, genitourinary, nervous system disorders, orthopedic disorders, eye, ear and skin disorders and communicable diseases
- 2. Provide care to children with common behavioural, social and psychiatric problems
- 3. Manage challenged children
- 4. Identify the social and welfare services for challenged children

COURSE OUTLINE

T - Theory

Unit	Time	Learning Outcomes	Content	Teaching/ Learning Activities	Assessment Methods
	(Hrs)			Activities	Methous
1	` ′	Describe the etiology, pathophysiology, clinical manifestation and nursing management of children with disorders of cardiovascular, gastrointestinal, genitourinary, and nervous system	Cardiovascular system: Identification and Nursing management of congenital malformations Congenital heart diseases: Cyanotic and Acyanotic (ASD,VSD, PDA,TOF) Others: Rheumatic fever and Rheumatic heart disease, Congestive cardiac failure Hematological conditions: a) Congenital: Hemophilia, Thalassemia b) Others: Anemia, Leukemia, Idiopathic thrombocytopenic purpura, Hodgkins and non-hodgkins lymphoma Gastro-intestinal system: Identification and Nursing management of congenital malformations. Congenital: Cleft lip, Cleft palate, Congenital hypertrophic pyloric stenosis, Hirschsprungs disease (Megacolon), Anorectal malformation, Malabsorption syndrome, Abdominal wall defects, Hernia Others: Gastroenteritis, Diarrhea, Vomiting, Protein energy malnutrition, Intestinal obstruction, Hepatic diseases, intestinal parasites Genitourinary urinary system: Identification and Nursing management of congenital malformations. Congenital: Wilms tumor, Extropy of bladder, Hypospadias, Epispadias, Obstructive uropathy Others: Nephrotic syndrome, Acute glomerulonephritis, renal failure Nervous system: Identification and Nursing management of congenital malformations. FNB160402- MENTAL HEALTH NURSING-II

PLACEMENT: VI SEMESTER

THEORY: 1 Credit (40 Hours)

PRACTICUM: Clinical: 2 Credits (160 Hours)

DESCRIPTION: This course is designed to provide the students with basic understanding and skills essential to meet psychiatric emergencies and perform the role of community mental health nurse.

COMPETENCIES: On completion of the course, the students will be able to

- 1. Apply nursing process in providing care to patients with substance use disorders, and personality and sexual disorders.
- 2. Apply nursing process in providing care to patients with behavioural and emotional disorders occurring during childhood and adolescence.
- 3. Apply nursing process in providing care to patients with organic brain disorders.
- 4. Identify and respond to psychiatric emergencies.
- 5. Carry out crisis interventions during emergencies under supervision.
- 6. Perform admission and discharge procedures as per MHCA 2017.
- 7. Explore the roles and responsibilities of community mental health nurse in delivering community mental health services.

FNB160403- NURSING MANAGEMENT AND LEADERSHIP

PLACEMENT: VI Semester

THEORY: 3 Credits (60 hours) includes Lab/Skill Lab hours also

PRACTICUM: Clinical: 1 Credits (80 hours)

DESCRIPTION: This course is designed to enable students to acquire knowledge and competencies in areas of administration, and management of nursing services and education. Further prepares the students to develop leadership competencies and perform their role as effective leaders in an organization.

COMPETENCIES: On completion of the course, the students will be able to

- 1. Analyze the health care trends influencing development of nursing services and education in India.
- 2. Describe the principles, functions and process of management applied to nursing.
- 3. Develop basic understanding and beginning competencies in planning and organizing nursing services in a hospital.
- 4. Apply the concept of human resource management and identify the job description for all categories of nursing personnel including in service education.
- 5. Discuss the principles and methods of staffing and scheduling in an individual hospital/nursing unit.
- 6. Develop skill in management of materials and supplies including inventory control.
- 7. Develop team working and inter professional collaboration competencies.
- 8. Identify effective leadership styles and develop leadership competencies.
- 9. Utilize the knowledge of principles and line of control and participate in quality management and evaluation activities.
- 10. Utilize the knowledge related to financial planning in nursing services and education during budgetary process.
- 11. Apply the knowledge of nursing informatics in maintenance of records and reports relevant to patient information, nursing care and progress.
- 12. Demonstrate understanding of the INC guidelines for establishment and accreditation of educational institutions in terms of faculty norms, physical infrastructure and clinical facilities.
- 13. Demonstrate beginning competencies in planning, organizing and staffing at college including implementation and evaluation of

Faculty of Nursing Gokul Nursing College

curriculum.

- 14. Identify the legal issues and laws relevant to nursing practice and education.
- 15 Apply the knowledge and utilize the various opportunities for professional advancement.

COURSE OUTLINE

T – Theory

Unit	Time (Hrs)		Content	Teaching/ Learning Activities	Assessment Methods
I	1 (T)	Explore the health care, development of nursing services and education in India and trends	Health Care and Development of Nursing Services in India Current health care delivery system of India – review Planning and development of nursing services and education at global and national scenario Recent trends and issues of nursing service and management	Lecture cum discussion Directed reading and written assignment	Short answerAssessment of assignment
II	2 (T)	Explain the principles and functions of management applied to nursing Describe the introductory concepts of management as a process	Management Basics Applied to Nursing Definitions, concepts and theories of management Importance, features and levels of management Management and administration Functions of management Principles of management Role of a nurse as a manager Introduction to Management Process Planning Organizing Staffing Directing/Leading Controlling	Lecture and discussion	• MCQ Short answer

				(Gujarat Private State University	y Act 4 of 2018)
Unit			Content	Teaching/ Learning Activities	Assessment
	(Hrs)	Outcomes			Methods
III	4 (T)	Describe the essential elements of	Planning Nursing Services • Vision, Mission, philosophy,		of problem- solving
		planning	objectives		exercises
			 Nursing service policies, procedures and manuals Functional and operational planning Strategic planning 		• Visit Report
			Program planning – Gantt chart & milestone chart		
			• Budgeting – concepts, principles, types,		
			Budget proposal, cost benefit analysis		
			Planning hospital and patient care unit (Ward)		
			Planning for emergency and disaster		
IV	4 (T)	Discuss the	Organizing	Lecture cum discussion	• Short answer
		concepts of organizing including hospital organization	Organizing as a process – assignment, delegation and coordination	Comparison of organizational structure of various organizations	• Assessment of assignment
			Hospital – types, functions & organization	• Nursing care delivery systems – assignment	
			Organizational development	• Preparation of	
			Organizational structure	Organizational chart of hospital/ Nursing services	
			Organizational charts		
			Organizational effectiveness		
			Hospital administration, Control & line of authority		
			Hospital statistics including hospital utilization indices		
			Nursing care delivery systems and trends		
			Role of nurse in maintenance of effective organizational climate		

			(Gujarat Private State Universit	y Act 4 of 2018)
V	6 (T) Identify the significance of human resource management (HRM) and material management and discuss its elements	 Definition, objectives, components and functions Staffing & Scheduling Staffing - Philosophy, staffing activities Recruiting, selecting, deployment Training, development, credentialing, retaining, promoting, transfer, terminating, superannuation Staffing units - Projecting staffing requirements/calculation of requirements of staff resources Nurse patient ratio, Nurse Population ratio as 	Lecture and discussion Role play Games self-assessment, case discussion and practice session Calculation of staffing requirements for a specified ward	Formulate Job description at different levels of care & compare with existing system Preparation of duty roster
	Explain the	per SIU norms/IPH Norms, and Patient classification system Categories of nursing personnel including job description of all levels Assignment and nursing care responsibilities Turnover and absenteeism Staff welfare Discipline and grievances In-Service Education		
	procedural steps of material management Develop managerial skill in inventory control and actively participate in procurement process	 Nature and scope of in-service education program Principles of adult learning – review Planning and organizing in-service educational program Methods, techniques and evaluation Preparation of report Material Resource Management Procurement, purchasing process, inventory control & role of nurse Auditing and maintenance in hospital and patient care unit 		

Unit	Time (Hrs)	0	Content	Teaching/ Learning Activities	Assessment Methods
VI	5 (T)	Describe the important methods of supervision and guidance	 Directing and Leading Definition, principles, elements of directing Supervision and guidance Participatory management Inter-professional collaboration Management by objectives Team management Assignments, rotations Maintenance of discipline Leadership in management 	Lecture and discussion Demonstration of record & report maintenance in specific wards/ departments	Assignment on Reports & Records maintained in nursing department/ Preparation of protocols and manuals
VII	4 (T)	Discuss the significance and changing trends of nursing leadership Analyze the different leadership styles and develop leadership competencie s	 Leadership Definition, concepts, and theories Leadership principles and competencies Leadership styles: Situational leadership, Transformational leadership Methods of leadership development Mentorship/preceptorship in nursing Delegation, power & politics, empowerment, mentoring and coaching Decision making and problem solving Conflict management and negotiation Implementing planned change 	 Lecture cum discussion Self-assessment Report on types of leadership adopted at different levels of health care in the given setting Problem solving/ Conflict management exercise Observation of managerial roles at different levels (middle level mangers-ward incharge, ANS) 	 Short answer Essay Assessment of exercise/report t

CLINICAL PRACTICUM

Clinical: 2 Credits (80 hours) 2 weeks \times 40 hours per week = 80 hours

Practice Competencies:

Hospital

- 1. Prepare organizational chart of hospital/Nursing services/nursing department
- 2. Calculate staffing requirements for a particular nursing unit/ward
- 3. Formulate Job description at different levels of care
- 4. Prepare duty roster for staff/students at different levels
- 5. Participate in procuring/purchase of equipment & supplies
- 6. Prepare log book/MMF for specific equipment/materials
- 7. Maintain and store inventory and keep daily records

- 8. Prepare and maintain various records & reports of the settings incident reports/adverse reports/audit reports
- 9. Prepare and implement protocols & manuals
- 10. Participate in supervision, evaluation and conducting in service education for the staff

College & Hostel

- 1. Prepare organizational chart of college
- 2. Formulate job description for tutors
- 3. Prepare Master plan, time table and clinical rotation
- 4. Prepare student anecdotes
- 5. Participate in planning, conducting and evaluation of clinical teaching

FNB160404- MIDWIFERY /OBSTETRICS AND GYNECOLOGY (OBG) NURSING - I

PLACEMENT: VI SEMESTER

THEORY: 3 Credits (60 hours)

PRACTICUM: Skill Lab: 1 Credit (40 hours); Clinical: 3 Credits (240 hours)

DESCRIPTION: This course is designed for students to develop knowledge and competencies on the concepts and principles of midwifery. It helps them to acquire knowledge and skills in rendering respectful maternity care to woman during antenatal, intranatal and postnatal periods in hospitals and community settings. It further helps to develop skills in managing normal neonates and participate in family welfare programs.

COMPETENCIES: On completion of the program, the students will be able to

- 1. Demonstrate professional accountability for the delivery of nursing care as per INC standards/ICM competencies that are consistent with moral, altruistic, legal, ethical, regulatory and humanistic principles in midwifery practice.
- 2. Communicate effectively with individuals, families and professional colleagues fostering mutual respect and shared decision making to enhance health outcomes.
- 3. Recognize the trends and issues in midwifery and obstetrical nursing.
- 4. Review and describe the anatomy and physiology of human reproductive system and conception.
- 5. Describe and apply physiology in the management of normal pregnancy, birth and puerperium.
- 6. Demonstrate competency in providing respectful and evidence based maternity care for women during the antenatal, intranatal and postnatal period.
- 7. Uphold the fundamental human rights of individuals when providing midwifery care.
- 8. Promote physiologic labour and birth, and conduct normal childbirth.
- 9. Provide evidence based essential newborn care.
- 10. Apply nursing process approach in caring for women and their families.
- 11. Describe the methods of contraception and role of nurse/midwife in family welfare services.
- 12. Recognize the importance of and actively participate in family welfare programs.
- 13. Provide youth friendly health services and care for women affected by gender based violence

COURSE OUTLINE

Unit	Time	Learning Outcomes	Content	Teaching/Learning	Assessment
	(Hrs)			Activities	Methods
		Explain the history	Introduction to midwifery		
		and current scenario of midwifery in India	History of midwifery in India		
			• Current scenario:		
		Review vital health indicators	o Trends of maternity care in India		
			o Midwifery in India – Transformative education for relationship based and transformative midwifery practice in India Vital health indicators – Maternal mortality ratio, Infant Mortality		
		Describe the various national health programs related to RMNCH+A	Rate, Neonatal Mortality Rate, perinatal mortality rate, fertility rates O Maternal death audit		
		Identify the trends and issues in midwifery	National health programs related to RMNCH+A (Reproductive Maternal Newborn and Child Health + Adolescent Health)		
		indwitery	Current trends in midwifery and OBG nursing: o Respectful maternity and newborn care (RMNC) o Midwifery-led care units (MLCU) o Women centered care, physiologic birthing and demedicalization of birth o Birthing centers, water birth, lotus birth		
			o Essential competencies for midwifery practice (ICM) o Universal rights of child-bearing women o Sexual and reproductive health and rights o Women's expectations & choices about care Legal provisions in midwifery practice in India: • INC/MOH&FW regulations • ICM code of ethics		
		Discuss the legal and ethical issues relevant to midwifery practice	 Ethical issues in maternal and neonatal care Adoption laws, MTP act, Pre-Natal Diagnostic Test (PNDT) Act, Surrogate mothers Roles and responsibilities of a midwife/Nurse practitioner midwife in different settings (hospital/community) Scope of practice for midwives 		

—— Faculty of Nursing ——— Gokul Nursing College

Unit	Time (Hrs)	Learning Outcomes	Content	Teaching/Learning Activities	Assessment Methods
III	6 (T) 3 (L) 12 (T) 10 (L) 40 (C)	Review the anatomy and physiology of human reproductive system Provide preconception care to eligible couples	Anatomy and physiology of human reproductive system and conception (Maternal, Fetal & Newborn physiology) Review: Female organs of reproduction Female pelvis – bones, joints, ligaments, planes, diameters, landmarks, inclination, pelvic variations Foetal skull – bones, sutures, fontanelles, diameters, moulding Fetopelvic relationship Physiology of menstrual cycle, menstrual hygiene Fertilization, conception and implantation Embryological development Placental development and function, placental barrier Fetal growth and development Fetal circulation & nutrition Assessment and management of normal pregnancy (ante-natal):	 Lecture Discussion Self-directe d learning Models Videos & films 	 Quiz Short answer Essay Short answer Objective type
			 Pre-pregnancy Care Review of sexual development (Self Learning) Socio-cultural aspects of human sexuality (Self Learning) Preconception care Pre-conception counseling (including awareness regarding normal birth) Genetic counseling (Self Learning) Planned parenthood 	 Demonstration Self-Learning Health talk Role play Counseling session 	 Assessment of skills with check list Case study evaluation OSCE

Describe the physiology, assessmen and management of normal pregnancy

Pregnancy assessment and antenatal care (I, II & III Trimesters)

Normal pregnancy

- Physiological changes during pregnancy
- Assess and confirm pregnancy: Diagnosis of pregnancy – Signs, differential diagnosis and confirmatory tests
- Review of maternal nutrition & malnutrition
- Building partnership with women following RMC protocol
- Fathers' engagement in maternity care

Ante-natal care:

1st Trimesters

- Demonstrate knowledge, attitude and skills of midwifery practice throughout 1st,2nd and 3rd trimesters
- Antenatal assessment: History taking, physical examination, breast examination, laboratory investigation
- Identification and management of minor discomforts of pregnancy
- Antenatal care : as per GoI guidelines
- Antenatal counseling (lifestyle changes, nutrition, shared decision making, risky behavior, sexual life during pregnancy, immunization etc.)
- Danger signs during pregnancy
- Respectful care and compassionate communication
- Recording and reporting: as per the GoI Roleplay guidelines
- Role of Doula/ASHAs

II Trimester

- Antenatal assessment: abdominal palpation, fetal assessment, auscultate fetal heart rate - Doppler and pinnard's stethoscope
- Assessment of fetal well-being: DFMC, biophysical profile, Non stress test, cardio-tocography, USG, Vibro acoustic stimulation, biochemical tests.
- Antenatal care
- Women centered care

- Case discussion/ presentation
- Simulation
- Supervised clinical practice

- Refer SBA module & Safe motherhood booklet
- Lab tests performance and interpretation
- Demonstration

Demonstration of antenatal assessment

Faculty of Nursing Gokul Nursing College

	(Gujarat Private State University Act 4 of 2018)
Respectful care and compassionate communication	
Health education on IFA, calcium and vitamin D supplementation, glucose tolerance test, etc.	
 Education and management of physiological changes and discomforts of 2nd trimester 	
Rh negative and prophylactic anti D	
Referral and collaboration, empowerment	
Ongoing risk assessment	
Maternal Mental Health	
III Trimester	
• Antenatal assessment: abdominal palpation, fetal assessment, auscultate fetal heart rate – Doppler and pinnard's stethoscope	
 Education and management of physiological changes and discomforts of 3rd trimester 	Lecture Simulation
Third trimester tests and screening	• Role play
 Fetal engagement in late pregnancy Childbirth preparation classes Birth preparedness and complication readiness including micro birth planning 	 Refer GoI Guideline s Health talk Counseling session
Danger signs of pregnancy – recognition of ruptured membranes	Demonstration
Education on alternative birthing positions – women's preferred choices, birth companion	of birthing positions Workshop on alternative birthing
Ongoing risk assessment	positions
Cultural needs	
Women centered care	
Respectful and compassionate communication	
Health education on exclusive breastfeeding	
Role of Doula/ASHA's

SYLLABUS

FNB170401- COMMUNITY HEALTH NURSING- II

PLACEMENT: VII SEMESTER

THEORY: 5 Credits (100 hours) – includes lab hours also

PRACTICUM: Clinical: 2 Credit (160 hours)

DESCRIPTION: This course is designed to help students gain broad perspective of specialized roles and responsibilities of community health nurses and to practice in various specialized health care settings. It helps students to develop knowledge and competencies required for assessment, diagnosis, treatment, and nursing management of individuals and families within the community in wellness and illness continuum.

COMPETENCIES: On completion of the course, the students will be able to

- 1. Demonstrate beginning practice competencies/skills relevant to provide comprehensive primary health care/community- based care to clients with common diseases and disorders including emergency and first aid care at home/clinics/centres as per predetermined protocols/drug standing orders approved by MOH&FW
- 2. Provide maternal, newborn and child care, and reproductive health including adolescent care in the urban and rural health care settings
- 3. Describe the methods of collection and interpretation of demographic data
- 4. Explain population control and its impact on the society and describe the approaches towards limiting family size
- 5. Describe occupational health hazards, occupational diseases and the role of nurses in occupational health programs
- 6. Identify health problems of older adults and provide primary care, counseling and supportive health services
- 7. Participate in screening for mental health problems in the community and providing appropriate referral services
- 8. Discuss the methods of data collection for HMIS, analysis and interpretation of data
- 9. Discuss about effective management of health information in community diagnosis and intervention

Approved By Govt. of Gujarat (Recognized by UGC under Section 22 & 2(f) of 1956)

10. Describe the management system of delivery of community health services in rural and urban areas

- 11. Describe the leadership role in guiding, supervising, and monitoring the health services and the personnel at the PHCs, SCs and community level including financial management and maintenance of records & reports
- 12. Describe the roles and responsibilities of Mid-Level Health Care Providers (MHCPs) in Health Wellness Centers (HWCs
- 13. Identify the roles and responsibilities of health team members and explain their job description
- 14. Demonstrate initiative in preparing themselves and the community for disaster preparedness and management
- 15. Demonstrate skills in proper bio-medical waste management as per protocols
- 16. Explain the roles and functions of various national and international health agencies

FNB170402- NURSING RESEARCH AND STATISTICS

PLACEMENT: VII SEMESTER

THEORY: 2 Credits (40 hours)

PRACTICUM: Lab/Skill Lab: 1 Credit (40 hours) Clinical Project: 40 hours

DESCRIPTION: The Course is designed to enable students to develop an understanding of basic concepts of research, research process and statistics. It is further, structured to conduct/ participate in need-based research studies in various settings and utilize the research findings to provide quality nursing care. The hours for practical will be utilized for conducting individual/group research project.

COMPETENCIES: On completion of the course, students will be competent to

- 1. Identify research priority areas
- 2. Formulate research questions/problem statement/hypotheses
- 3. Review related literature on selected research problem and prepare annotated bibliography
- 4. Prepare sample data collection tool
- 5. Analyze and interpret the given data
- 6. Practice computing, descriptive statistics and correlation
- 7. Draw figures and types of graphs on given select data
- 8. Develop a research proposal
- 9. Plan and conduct a group/individual research project

COURSE OUTLINE

FNB170403- MIDWIFERY /OBSTETRIC AND GYNECOLOGY NURSING - II

Gokul Nursing Gokul Nursing College

Including Safe Delivery App Module

PLACEMENT: VII SEMESTER

THEORY: 3 Credits (60 hours)

PRACTICUM: Skill Lab: 1 Credit (40 Hours) Clinical: 4 Credits (320 Hours)

DESCRIPTION: This course is designed for students to develop knowledge and competencies on the concepts and principles of obstetric and gynecology nursing. It helps them to acquire knowledge and skills in rendering respectful maternity care to high risk woman during antenatal, natal and postnatal periods in hospitals and community settings and help to develop skills in initial management and referral of high risk neonates. It would also help students to gain knowledge, attitude and skills in caring for women with gynecological disorders.

COMPETENCIES: On completion of the course, the students will be able to:

- 1. Describe the assessment, initial management, referral and respectful maternity care of women with high risk pregnancy.
- 2. Demonstrate competency in identifying deviation from normal pregnancy.
- 3. Describe the assessment, initial management, referral and nursing care of women with high risk labour.
- 4. Assist in the conduction of abnormal vaginal deliveries and caesarean section.
- 5. Describe the assessment, initial management, referral and nursing care of women with abnormal postnatal conditions.
- 6. Demonstrate competency in the initial management of complications during the postnatal period.
- 7. Demonstrate competency in providing care for high risk newborn.
- 8. Apply nursing process in caring for high risk women and their families.
- 9. Describe the assessment and management of women with gynecological disorders.
- 10. Demonstrate skills in performing and assisting in specific gynecological procedures.
- 11. Describe the drugs used in obstetrics and gynecology.
- 12. Counsel and care for couples with infertility.
- 13. Describe artificial reproductive technology.
