

Feedback from Student	Recommendation to competent Authority	Action Taken
Advancing the practical techniques will enhance the overall quality of the study.	Making plans to take more practically relevant courses is advised.	More practical are added, the syllabus is updated where necessary, and the issue is fixed.
Incorporating effective placement initiatives across all branches can lead to higher employment rates.	It is advised to schedule a greater number of placement drives.	The placement cell is notified to schedule an increasing number of placement drives. It is requested that additional businesses be invited to campus liaisons.
Effective interview preparation is essential to making a strong impression. Taking time to review key information and anticipate questions will improve your performance.	Incorporating training on resume writing and interview techniques is highly advisable. This would better prepare individuals for successful job applications and interviews.	The Training and Placement Cell has already implemented this, offering interview rehearsal sessions as part of their services.
Recommending books for each subject or offering hard copies of syllabus-based study materials, combined with additional tutorial sessions and expert lectures, would greatly enhance the learning process.	It is recommended that central libraries, university institutes, and websites offer more e-content, while instructors provide clear study materials for homework, and guest lectures or webinars from industry experts enhance learning with insights into current trends and technologies.	Through the university's ERP portal, instructors can upload course materials for students to access, and the central library provides e-books, textbooks, and Delnet access. Guest lectures, webinars, and online seminars enable students to engage with industry experts.

Feedback from Faculty member	Recommendation to competent Authority	Action Taken
It is essential that courses are designed to not only address the current academic requirements but also anticipate the skills and knowledge students will need in their careers.	Reviewing and taking the necessary action for Courses should incorporate skills and knowledge that are not only relevant to the current academic environment but also anticipate future industry demands.	Wherever necessary, the syllabus is already updated, after receiving the recommendations from industry experts and experts from other universities, the syllabus is revised appropriately, and the issue is fixed.
Implementing a more balanced curriculum will help bridge the gap between academic knowledge and industry needs.	When creating curricula, the relative importance of each domain should be maintained.	Although the curriculum appears to be balanced, the required changes have been made in accordance with the guidelines.
By providing time and opportunities for such professional engagement, the institution supports faculty development, which ultimately enhances the quality of education provided to students.	It is advised to prepare a budget for going to workshops, seminars, and other learning opportunities.	The staff members will be permitted to attend more academic events throughout a semester, as per the university's agreement, which acknowledged the recommendations.

Feedback from Alumni Students	Recommendation to competent Authority	Action Taken
Without regular interactions or common events, students may not have many opportunities to reconnect. It is important to create platforms or events that encourage pass-out students to stay in touch, network, and share experiences, helping to foster a sense of community and mutual support.	It is recommended to make a registered group of alumina students so they can cooperate with each other in various modes. It is recommended to create a social media account where alumni can join with each other.	The alumni association of the university is working on the same.
Seeking more placement-related activities for further support or engagement.	It is recommended to organize a job fair or parallel placement activity twice a year to enhance opportunities for both employers and job seekers. Holding such events regularly ensures that students and professionals have access to a wide range of job prospects, while employers can engage with potential candidates more efficiently.	On campus, a job fair is planned and a placement activity based on invitations is ongoing. In the future, employment fairs will occur more frequently.
By engaging in practical tasks, students not only gain a deeper understanding of their academic subjects but also develop critical thinking, problem-solving, and teamwork abilities that are highly valued by employers.	It is recommended to include courses that may be useful for Industry	The suggestions given by professionals in industry and other academic institutions are taken into consideration, and the syllabus is modified as needed.
